HELP SCREEN

IF THE WORK PATTERN IS NOT BASED ON A WEEK: get an average over the last
four weeks. If the CM has been off sick for a long period, take the usual hours worked
before going sick.

IF A PERSON HAS RECENTLY STARTED A NEW JOB: the usual hours should relate
to what the person expects them to be in the future.

FOR APPRENTICES, TRAINEES AND OTHER PEOPLE IN VOCATIONAL TRAINING:
exclude any time spent in school or other special training centres outside their
workplace.

CM's WORKING ON-CALL: If someone states at the hours questions that they usually
work 24 hours a day because they are 'on call', the average number of hours actually
worked should be probed for. Identify how many hours were actually worked in the last
four weeks and average these out to give a weekly total for usual hours. This should
include only those hours during which the CM was actually working. Therefore if, for
example, a CM was 'on-call' all night, but was only called out to work for two hours,
the actual working hours for this night would be two hours.
