#### NATIONAL CHILD DEVELOPMENT STUDY

#### DATA NOTE 1

#### NCDS5: Revised Housing Event History Dataset

#### Pamela Di Salvo & Kate Smith (SSRU)

#### **INTRODUCTION:**

The following document contains details of the revised dataset developed by Pamela Di Salvo at SSRU which contains amended data based on the Housing section of the NCDS5 'Your Life Since 1974' event history instrument. Note that throughout the document, 'SSRU' refers to the Social Statistics Research Unit at City University, London, which transferred in October 1998 to the Institute of Education and was re-named the Centre for Longitudinal Studies.

#### Contents:

1. Data cleaning and case selection

2. Contents of dataset -

list of variables variable labels data dictionary variable descriptives

3. Derived variables - details of the derived variables associated with the revised dataset:

#### 1. Data Cleaning & Case Selection

#### **Background:**

The fifth follow-up of the National Child Development Study (NCDS) took place in 1991 when the cohort members were age 33. Some 11,633 people (born between March 5 - 8th 1958) answered one or more sections of the study.<sup>1</sup> "Your Life Since 1974" was a self-completion questionnaire posted to the cohort members during the course of NCDS5 which asked for retrospective information on relationships, children, jobs and housing from the age of 16 until the time of the 1991 survey. 11,178 persons filled in either all or some of this section of the survey.

Page 21 from the housing section of "Your Life Since 1974" is reproduced in the Appendix for reference throughout this document.

Statistics and details on the housing data in "Your Life Since 1974" produced for this edition of 'Data Notes' were compiled specifically for a Joseph Rowntree Foundation project on the Analysis of Household Formation.

#### **Response rates:**

As with any data set, an indication of how representative the sample is of the population of interest is presented. Of particular concern for this project are the response rates of those who answered "Your Life Since 1974" as opposed to any other sections of NCDS and the bias introduced through selection of cases for these analyses. As stated in Life at 33 in a discussion of response bias, NCDS is unique in being able to compare findings from earlier sweeps with this most recent sweep. Table 1 outlines preliminary comparisons between percentages of cohort member characteristics found in the most comprehensive NCDS source available (our target) and percentages for those who responded to the "Your Life Since 1974" questionnaire.

<sup>&</sup>lt;sup>1</sup> For further information on NCDS5in general see: *Life at 33* edited by Elsa Ferri and published by the National Children's Bureau, 1993.

Respondent Characteristics	Previous sweeps % target	"Your Life Since 1974" % achieved	% bias
Sex NCDS/3- male	51.7	48.8	-5.61
Country of Birth NCDS3- other than the British Isles	4.3	3	-30.23
Cohort Member ever in Care - NCDS3	3.6	2.8	-22.22
Likely to leave school at 16 - NCDS3	62.5	60.3	-3.52
Reading comprehension at 16 NCDS3 - <21 points scored	22.9	19.4	-15.28
General achievement by 1976 (EXAMS - 1978) - no grade at CSE or GCE or higher	30.2	26.3	-12.91
General achievement by 1976 (EXAMS - 1978) - 1 or more A-levels	12.6	13.9	+10.32
Fathers social class 1974 NCDS3- manual	58.6	57.3	-2.22
Father stayed at school post 16 - NCDS3	21.8	22.7	+4.13
No male head-of-household 1974 - NCDS3	7.7	6.9	-10.39
Tenure 1974 NCDS3- council rented	40.7	38.8	-4.67
Type of accommodation 1974 NCDS3- flat	8.9	7.6	-14.61
Overcrowding at 16 (>1 person/room) - NCDS3	32.0	30	-6.25
One or more shared amenities at 16 - NCDS3	6.3	5.9	-6.35
Family moves since birth NCDS3 -3 or more	26.8	25.5	-4.85
Own room to do homework NCDS3 - no	11.6	11.1	-4.31
Smokes a pack or more a week - NCDS3	22.3	21.3	-4.48
sample size	N = varies	N = 11,178	

### Table 1:Response bias - comparison of earlier sweeps & "Your Life Since 1974"<br/>responses

note: percentage bias is calculated as: ((%achieved-%target)/(%achievedx100).

A negative bias reflects under-representation in 'Your Life Since 1974' and positive - over representation.

Table 1 shows, on the whole, that the percentages found in "Your Life Since 1974" are not substantially different from those found in earlier sweeps of NCDS, particularly with regards to housing experiences at 16. When target percentages are rather small, there tends to be a noticeably larger percentage bias difference. Of particular interest are the smaller percentages found in "Your Life Since 1974" of: cohort members born outside the British Isles; cohort members who have ever been in care; cohort members whose reading scores at 16 fell within the lowest quartile; and those who were living in families with no male head-of-household in 1974. Those whose academic achievements by 1976 were among the lowest are particularly under-represented while those with higher academic achievements are over-represented, presumably reflecting greater difficulty posed to the former by the form. The only notable variation in the housing variables is with those who were living in a flat in 1974. Many of these comparisons do not reflect a statistically significant difference in cohort member participation in "Your Life Since 1974".

#### **Problems with the data:**

The 'newness' of the data indicated that substantial checks should performed on the 'quality' of the housing section of "Your Life Since 1974" in order to ensure that longitudinal analyses could be carried out with confidence. As a first step, the numbers of missing dates and household composition codes in all 16 addresses for all 11,178 cases were calculated. A total of 292 cases were discarded at this stage due to either all missing dates (32 moved in and moved out dates, pages 21- 24 no. 12a & 12b) or all missing household composition codes (pages 21-24 no.12e). Spells where the housing history was out of sequence, negative spells (moving in date is later than the moving out date), and gaps (periods of time not accounted for by any of the addresses given) in the housing history were then identified. 735 cases contained one or more of these errors (6.5% of remaining cases). In approximately 25% of these cases a look at the original questionnaire was necessary in order to correct the inconsistencies. 75 more cases were discarded when these errors could not be rectified. Table 2 shows the 'retention' bias comparison on characteristics from earlier sweeps for those who answered "Your Life Since 1974" and those that were retained for the purposes of these analyses. Only those characteristics which are affected by more than a bias percentage point on top of the previous comparison with earlier NCDS sweeps are shown (please note that the bias introduced by discarding 367 cases from the "Your Life Since 1974" set should not be thought of as additive with respect to the bias outlined in Table 1).

Table 2:'Retention' bias - comparison of the "Your Life Since 1974" respondents and<br/>those who were retained for the Household Formation analyses (NCDS1-4<br/>characteristics)

Respondent Characteristics	"Your Life Since 1974" % target	This project % achieved	% bias
Country of Birth - other than the British Isles	3	2.9	-3.33
Cohort Member ever in Care - NCDS3	2.8	2.7	-3.57
Reading comprehension at 16 - <21 points scored	19.4	19.0	-2.06
General achievement by 1976 - no grade at CSE or GCE or higher	26.3	25.9	-1.52
No male head-of-household 1974	6.9	6.8	-1.44
other than the	N = 11,178	N = 10,811	

As evidenced by Table 2, the 367 cases discarded for these analyses have little effect with regards to altering previous estimates of response bias. Table 3 looks at some of the variables collected during the Cohort Member Interview (CMI) at NCDS5.

Table 3:	'Retention' bias - comparison of the "Your Life Since 1974" respondents and
	those who were retained for the Household Formation analyses (Cohort Member
	Interview characteristics)

Respondent Characteristics	CMI % target (a)	'Your Life' % achieved (b)	This project % achieved (c)	%bias/ % additional <sup>2</sup>
Current Economic Activity - Unemployed	4.0	3.9	3.8	-5.0/-2.56
Current Tenure - rented accommodation	19.9	19.7	19.2	-3.52/-2.54
Current Tenure - buying	75.8	76.1	76.6	+1.05/.657
Cohort Member lives with others -no	12.1	12.0	11.8	-2.48/-1.67
sample size	N = 11,407	N = 11,178	N = 10,811	

#### **Cases identified:**

A total of 10,811 cases remained for use in the analyses for this project; of those 660 records were altered in some way. The Appendix lists the serial numbers of these cases according to the type of error which was found. The table also contains information on whether or not the original questionnaire was consulted in order to correct the 'mistake'. Each serial number appears only once in the table although the case may have obtained more than one type of error.

Problems could be identified in groups such as: spells within spells, data entry/'typos', duplicate addresses, sequencing ie current spell first instead of last, backwards histories etc. A history, for example, in which a cohort member has moved to college but technically remains a resident in their parental home during their time at college may have given the dates moved in and moved out for the college address within the period of time given in the previous parental address, this would be a spell within a spell and would have been expanded to three spells.

Due to the nature of the analyses, any individual with two homes during the same time period would be difficult to incorporate into the analysis. For instance, a cohort member who owned a home in Devon but also lived in a company flat in London during the same time period has been 'given' only one of the addresses. The decision on which address to keep was made on the basis of who the cohort member was living with and the tenure of the accommodation.

**Miscellaneous** errors such as 17 given as a month moved in or out were changed either after checking the questionnaire for a "best guess" or were given a missing month (which would be estimated as 6 in most of the analyses). In some cases where an error occurred in no more

<sup>&</sup>lt;sup>2</sup> percentage bias is calculated as:((c-b)/(b)x100). percentage additional is calculated as: ((c-a)/(a)x100-((b-a)/(a)x100).

than a few addresses in the history and these addresses (as opposed to the entire history) could not be rectified, the dubious dates were changed to missing. Missing dates for some addresses were obtained by 'carrying over' the date from either the previous year moved out or the following year moved in.

Additional spells were collected from the original questionnaire for 54 out of 65 cases who had indicated that they had had more than the 16 addresses allowed for on the questionnaire (these are kept in a separate file for the sake of space). Current spells were also obtained from the CMI for 100 of the 145 cases who had not given a current spell on the "Your Life Since 1974" questionnaire.

After the cleaning process was completed, all records were formatted in the following way: valid spells in sequential order from 1974, followed by the current spell (address at the time of the interview) identified by the zeros in the month and year moved out, followed by missing for individuals who did not have 16 or more moves. Of the original 11,178 cases who answered "Your Life Since 1974" only 9.2% were either discarded (3.3%) or altered (5.9%) by this cleaning exercise.

A few general observations about the data were made during this cleaning process. The answer given to question no. 11 page 20 was inconsistent. Some respondents omitted one or more address (probably their address at 16) in their calculation, others included addresses pre-16 although the instructions said not to (this was true of the entire housing section). Therefore, an additional variable was created, spells, to count the number of addresses a cohort member has had since their 16 birthday. For those with more than 16 addresses the total number of spells was entered on their record manually, if they did not provide information on more than 16 addresses only 16 spells are recorded for this variable. Also question 12g, "What was your main reason for moving at this time ?" was interpreted to mean both moving in and moving out, so the answers to this question are not deemed reliable. Finally, some respondents in answering question 12e included children as "others" although they were instructed not to. These occurrences were not quantified and were only casually observed when looking at the original

questionnaires.

#### **Revised Dataset:**

The corrections outlined in this document are available in an SPSS dataset. This revised dataset was originally written in SPSS for Windows format.

#### 3. Derived variables

#### Introduction:

The following documentation gives details of derived variables that have been developed to summarise various states associated with the revised dataset.

The variables included are:

hc 1 to hc 16 - household composition for each address

indate1 to indate16 - calculates a date of entry for each address

leave - calculates the number of the first address after leaving parental home

dest1 - destination of the first move out of parental home

tenure1 - tenure of first move out of parental home

type 1 - type of accommodation of first move out of parental home

tenatt33 - tenure of address at 33

hcat33 - housing composition of address at 33

A comprehensive description of each variable is provided including source variables and the SPSS code to create the variable.

NCDS5 Household Composition - Derived Variables \_\_\_\_\_ Author: Pamela Di Salvo (SSRU) \_\_\_\_\_ Oueries: \_\_\_\_ All queries about these variables should be addressed to: NCDS User Support Group Tel: 0171 477 8484 Social Statistics Research Unit Fax: 0171 477 8583 City University Email: ncds@ssru.city.ac.uk Northampton Square London EC1V OHB Variable Names: hcl to hcl6 \_\_\_\_\_ Note: These variables appear on the revised housing event history dataset Description of variables: ------This code produces single variables on household composition for each address (up to a maximum of 16) in the housing section of the NCDS5 'Your Life Since 1974' questionnaire. It combines (up to) five variables which hold the answers to the question: "When you moved in what other adults shared your accommodation ?" Six possibilities have been devised: 1) one person households (ie cohort member only); 2) cohort member with parents(in-law), and possibly others, but not a spouse or partner; 3) cohort member with parents(in-law) and spouse or partner and possibly others; 4) cohort member, friends, other relatives, or others but no spouse, partner or parent; 5) cohort member and spouse or partner but no others; 6) cohort member, spouse or partner and others (but not parents). Source variables: All variables are taken from the housing section of 'Your Life Since 1974' self completion questionnaire. Instrument Question Variables \_\_\_\_\_ \_\_\_\_\_ \_\_\_\_\_ Q.12 e) page 21 Address 1: R508124 to R508128 Your Life Address 2: R508140 to R508144 Address 3: R508156 to R508160 Address 4: R508172 to R508176 Address 5: R508224 to R508228 page 22 Address 6: R508240 to R508244 Address 7: R508256 to R508260 Address 8: R508272 to R508276 Address 9: R508324 to R508328 Address 10: R508340 to R508344 page 23 Address 11: R508356 to R508360 Address 12: R508372 to R508376 Address 13: R508424 to R508428 page 24 Address 14: R508440 to R508444 Address 15: R508456 to R508460 Address 16: R508472 to R508476
