Introduction

This note reports on the approach adopted to ethical review and informed consent for the various stages of the Millennium Cohort Study (MCS) - a continuing, multi-disciplinary longitudinal study which takes as its subjects all those born in selected areas of England, Scotland, Wales and Northern Ireland over a 17 month period in 2000-2002.

Below, a brief summary of the background to the study is followed by an account of how the approach to ethical review and consent has changed over the course of the study to date. Examples of letters, leaflets and consent forms used for various MCS surveys are provided in an Annex.

Background

The Millennium Cohort Study (MCS) is a multi-disciplinary research project following the lives of around 19,000 children born in the UK in 2000-2. It is the most recent of Britain’s world-renowned national longitudinal birth cohort studies. The study has been tracking the Millennium children through their early childhood years and plans to follow them into adulthood. It collects information on the children’s siblings and parents. MCS’s field of enquiry covers such diverse topics as parenting; childcare; school choice; child behaviour and cognitive development; child and parental health; parents’ employment and education; income and poverty; housing, neighbourhood and residential mobility; and social capital and ethnicity.

The study was commissioned by the Economic and Social Research Council (ESRC - http://www.esrc.ac.uk/), whose funding has been supplemented by a consortium of Government departments and the Wellcome Trust (http://www.wellcome.ac.uk/)

The data for all MCS sweeps is available to researchers from the UK Data Service (http://www.ukdataservice.ac.uk/).

MCS and ethical review

Those responsible for the study have been concerned that appropriate procedures for ethical review and consent are followed. Currently in the UK, probably the most important route for ethical approval for studies like MCS is the National Health Service (NHS) Research Ethics Committee (REC) system.

NHS Research Ethics Committees (RECs) are appointed by the Strategic Health Authorities in England, their equivalents in Scotland and Wales and the Health and Social Care Business Services Organisation in Northern Ireland. RECs safeguard the rights, safety, dignity and well-being of people participating in research. They review applications for research and give an opinion about the proposed participant involvement and whether the research is ethical. Each consists of between seven and 18 volunteer members. At
least one-third of the members must be ‘lay’ whose main personal or professional interest is not in a research area. The remainder of the committee are expert members, who are specialists including doctors, other healthcare professionals and academics.

MREC ethical approval has been sought for all MCS follow-ups as indicated in the table below.¹.

### Summary of MCS MREC ethical approval 2000-2015

</tr>
</tbody>
</table>

Separate MREC approval has also been obtained for a number studies that gather additional information from and/or about the MCS cohort, including the collection of oral fluids, milk teeth and the monitoring of activity. Further information is available from the CLS website (http://www.cls.ucl.ac.uk/) or by emailing: clsfeedback@ucl.ac.uk.

### MCS and consent

The approach to consent has also been consistent. MRECs are most often concerned to see explicit written consent to all or particular elements of a survey and, from the outset MCS has sought informed parental consent. Letters and leaflets sent in advance of the surveys have summarised what participation in the survey will involve and written consent has been sought from parents for their participation and the participation of their child(ren). Written consent has also been sought for gathering information from health, education and economic records and from teachers.

Where parents give consent to the participation of their child(ren) in one or more elements of a survey the inclusion of the child(ren) requires their agreement and compliance. Although no

¹ For more details see the NHS National Research Ethics Service website: http://www.nres.npsa.nhs.uk/
attempt has been made to date to obtain the written consent of the MCS child subjects, it is anticipated that such consent will be sought in future surveys.

As with the other CLS cohort studies and irrespective of any consent or assent, individuals are able to refuse to participate in any element of a survey or withdraw from the study at any time by simply expressing the wish to do so.

A summary of the consents sought for each MCS survey is provided below. Copies of the relevant letters, leaflets and consent forms are provided in the Annex.

**MCS1 Consents**

The sample for the first MCS survey (MCS1) was drawn from all live births in the UK over 12 months from 1 September 2000 in England & Wales and 1 December 2000 in Scotland and Northern Ireland. It was selected from a random sample of electoral wards, disproportionately stratified to ensure adequate representation of all four UK countries, deprived areas and areas with high concentrations of Black and Asian families. Children with appropriate birth dates and living in selected wards were selected from the Child Benefit register by the Department of Social Security (DSS) responsible for administering the benefit. DSS sent a letter and leaflet to selected families giving them an opportunity to opt-out of the survey.

At the end of the main interview, the respondent who was the natural mother (or, in her absence, the main carer) was asked to read and decide whether to sign a consent form giving permission to link their survey data to health data. Interviewers were asked to ensure that all respondents read this form thoroughly before deciding whether or not to sign. If a respondent was unable to read the form for any reason (perhaps due to reading/sight problems or because they are attending to the baby’s needs), interviewers were instructed to read it out.

There were two distinct consents on the form:

- The first (A) asked for consent to the research team obtaining information about the respondent’s pregnancy and baby’s birth from health records (computerised summaries, not individual notes). Only information about pregnancy and birth was to be obtained. This information will be of great benefit to the study as it will give researchers a more complete picture of cohort member’s starts in life.
- The second (B) consent asked to link to the National Health Service Central Register (NHSCR). This study, like the previous cohort studies, would like to mark the records of the cohort children on this register. This is to help keep track of them in the future, should other contact be lost. The register contains NHS number and the health authority for which their GP works, but not detailed medical records or individual addresses. Though neither the NHSCR nor the Health Authority provide addresses directly, other cohort studies have been able to re-establish lost contact with some
cohort members by asking the health authority to forward a letter. It is, of course, up to the cohort member or their family to decide whether or not to respond.

The NHSCR can also tell the study team if a cohort member dies though interviewers were not required to volunteer this information unless asked.

Respondents who were willing to give consent signed and printed their name and dated the form. It was possible to give one consent but withhold the other simply by crossing out either A or B. Only the natural mother can give consent for her pregnancy records to be accessed. If a father or other relative was the main carer and was completing this consent form, they could give consent with respect only to clause B.

The consent form was translated into the same languages as the advance letter and simplified leaflet.

As the table below shows, consent to linkage was given for 9 out 10 children in the MCS1 achieved sample.

**Consent to linkage to birth and hospital records**

<table>
<thead>

<td>16,889</td>
</tr>
</tbody>
</table>

Examples of letters, leaflets and consent forms used for MCS surveys are reproduced in the Annex below.

**MCS2 Consents**

At the start of the MCS data collection, the interviewer asked the main respondent for written consent to the process by completing a Consent Form consisting of three separate sections relating to:

- The parental interview
- The Cohort Child - covering the assessments, measurements, collection of oral fluids and gathering of administrative data on hospital admissions
Older siblings - including permission for CLS to collect statistical data from the relevant authorities from school records. It was made clear to respondents that they could give permission to some elements and refuse permission for others and the Consent Form made provision for this.
The rates of consent in these different areas are shown below.

MCS3 Consents

As with all MCS surveys, an important requirement for the MCS3 survey was that all adult respondents had to give informed consent in writing to take part in the study. Written consent was also required from a parent or guardian for the participation of a child. This necessitated the use of several consent forms that had to be completed before parts of the survey could be administered. In addition, written consent was requested for linkage to health records, school records and to approach the class teacher.

Interviewers were prompted to collect the data collection consents at the end of the household questionnaire. It was possible for interviewers to leave the collection of some of the data collection consents until later in the interview, and prompts were built into several places within the CAPI questionnaire. Interviewers were prompted to collect consent for linkage to health records, school records and to approach the class teacher towards the end of main interview.

In total there were five consent forms for families in England, and four for families in other countries:

**Consents 1 and 2: Data collection** - The purpose of these forms was to gain consent from the parent(s) to administer the survey, and also to gain permission to carry out the cognitive assessments and physical measurements of the cohort children.

- Consent 1 was usually completed by the main carer of the cohort child, who was also usually the main respondent, but it was possible for it to be completed by either parent. It was split into two parts.
- The first part of the form gained consent to administer the CAPI and CASI for the parent or carer, and it was necessary for this to be completed before the interviewer started to administer the CAPI to the relevant parent.
- The second part of the form was to gain consent to administer the child cognitive assessments and measurements. Interviewers were first prompted to ask for this consent at the end of the household questionnaire. If they did not gain consent at this stage, they were prompted again at the end of the main questionnaire.

**Consent 2** was designed to collect consent to administer the CAPI and CASI to the other parent or carer, and was usually used for the partner respondent.

**Consent 3: Cohort child health records** - The main respondent CAPI contained questions about the cohort child’s health. To supplement this information permission was asked for access to the cohort children’s hospital admissions and treatment from the routine records kept by the National Health Service.
This consent had been included in MCS2, where permission, if given, covered data up to and including when the cohort children were seven years of age.

Interviewers were prompted to collect this consent towards the end of the main interview. If permission was given at MCS2, then permission was not needed again at MCS3.

**Consent 4: Cohort child school records - (England only)** - For every pupil in England, teachers complete the Foundation Stage Profile at the end of the child's reception year. The Foundation Stage profile collects information about children's social and personal, communication, language, literacy and mathematical development.

The information is passed from schools to the Local Education Authority where it is held centrally.

The fourth consent form in England asked for permission to access the child's Foundation Stage Profile. Interviewers were prompted to collect this consent towards the end of the main interview.

**Consent 4: Cohort child teacher survey - (Northern Ireland, Scotland and Wales)** - At present, only teachers in England complete the Foundation Stage Profile described above. In order to collect similar information in Northern Ireland, Scotland and Wales, it was necessary to approach teachers directly and ask them to complete a questionnaire. Consent 4 collected consent to do this for each child.

This formed the Teacher Survey, and details of this are contained in a separate technical report. Interviewers were prompted to collect this consent towards the end of the main interview.

**Consent 5: Older siblings questionnaire placement - England only** - The final consent form for England was to gain consent to place the older siblings questionnaires where applicable.

Almost two thirds (63.4%) of households had given permission for their cohort child’s health records to be accessed at MCS2. The majority of parents who did not give permission for this at MCS2 did give permission at MCS3.

The rates of consent in these different areas are shown below.

Examples of letters, leaflets and consent forms used for MCS surveys are reproduced in the Annex below

**MCS4 Consents**

There are 5 consent forms associated with MCS4:

**Consent 1: Main respondent** - The purpose of this form was to gain consent to administer the survey, and also to gain permission to access information from other sources for the main respondent.

The consent form was split into two parts:

**Part A** was used to gain consent to administer the CAPI and CASI for the main respondent, and it was necessary for this part of the form to be completed before the interviewer started to administer the CAPI to the main respondent.

**Part B** was used to gain permission to release the main respondent’s routine health and economic records; this part was completed at the end of the main respondent interview.

**Consent 2: Cohort child data collection** - This form was used to gain consent from either the main respondent or partner for the administration of the cohort child data-collection elements: cognitive assessments and physical measurements, physical activity monitoring and child self completion questionnaire. All sections of this consent form had to be completed by the same parent or guardian.

There were several opportunities to complete this consent form. Consents for the assessments and measurements were asked immediately after the household grid and again at the end of the main questionnaire (if not collected after the household grid). CAPI also asked interviewers to confirm that written consent had been obtained prior to administering each of the child elements.

For the child self-completion questionnaire, interviewers were asked to collect consent immediately after the household grid or at the end of the main questionnaire. For the activity...
monitor interviewers were prompted to explain it and collect consent after the physical measurements were taken.

**Consent 3: Cohort child - information from other sources** - In the main respondent questionnaire there were many questions about the cohort child’s experiences at school and their health and education. To supplement this information, permission was asked to send a questionnaire to the cohort child’s school teacher, and to access information held in routine records on education and health:

**Part A** of this consent form sought consent to administer the teacher questionnaire. Details of the Teacher Survey are contained in a separate technical report.

**Part B** of this consent form asked for parental consent to access information held in routine records on education and health.

Interviewers were prompted to collect this consent at the end of the main respondent interview, although the form could be signed by either the main respondent or the partner.

**Consent 4: Siblings - health and education records** - This form was used to gain permission from either the main respondent or partner to access the routine health and education records of the cohort child’s siblings in order to gain further insights into the cohort child’s development in relation to their siblings.

All types of siblings were eligible to be selected (natural, step, foster, adoptive, half) and up to four children were selected by the CAPI, and their names and other details will be shown on the consent screen. If there were more than four siblings, the four youngest were be selected.

Interviewers were prompted to collect this consent at the end of the main respondent interview, although the form could be signed by either the main respondent or the partner.

**Consent 5: Partner respondent** - The purpose of this form was to gain consent from the partner to administer the survey, and also to gain permission to access information from other sources.

**Part A** of this form was used to obtain consent from the partner respondent to administer the survey (CAPI and CASI), and interviewers were prompted to collect this consent before administering the CAPI to the partner.

**Part B** was used to gain permission to release the partner’s routine health and economic records; this part was completed at the end of the partner interview.
The consent forms were carbon-backed and printed in triplicate. One copy was retained by the respondent, and the other two copies returned by interviewers to NatCen’s operations department.

The rates of consent in these different areas are shown below.

**MCS5 Consents**

All adult respondents had to give informed consent in writing to take part in the study. Written consent was also required from a parent or guardian for the participation of a child. It is worth noting that parents were not asked to consent on behalf of the child, but were asked for their permission to allow the interviewer to speak to the child and ask for their consent to participate in each element.

Interviewers were also required to gain consent from the child that was as fully informed as possible. In order to ensure this, children needed to understand the full details of processes/experience of participation (e.g. the burden/emotional impact) and as much as could possibly be expected about the reasons for the study and how their data will be held and used.

There were four data collection consent forms and, for each, there was a related leaflet (or leaflets) for the respondent to read (or for the interviewer to explain). The table below summarises the consent forms and the corresponding leaflets.

<table>
<thead>
<tr>
<th>Consent form</th>
<th>Study elements covered</th>
<th>Purpose</th>
<th>Relevant respondent communication materials</th>
</tr>
</thead>
<tbody>
<tr>
<td>Main parent/guardian</td>
<td>CAPI and CASI and data linkage</td>
<td>To gain consent to administer the survey; and also to gain permission to link to the respondents economic records (data linkage).</td>
<td>Advance leaflet for parents (&quot;What is the Child of the New Century age 11 survey?&quot;) and data linkage leaflet (&quot;Is there any other information we would like?&quot;)</td>
</tr>
<tr>
<td></td>
<td></td>
<td>The consent form was split into two parts.</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>The first part was used to gain consent to administer the CAPI and CASI for the main respondent, and it was necessary for this part of the form to be completed before the interviewer started to administer the CAPI to the main respondent.</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>The second part was used to gain permission to release the main respondent’s economic records; this part was typically completed at the end of the main respondent interview.</td>
<td></td>
</tr>
</tbody>
</table>
| Child elements (completed by either the main parent OR the partner) | All child data collection elements:  
  - cognitive Assessments  
  - physical Measurements  
  - child self-completion questionnaire | This form was used to gain consent from either the main respondent or partner to ask the child whether they would be willing to complete the cohort child data-collection elements: cognitive assessments, physical measurements and child self-completion questionnaire. In England and Wales only, the consent form also asked the main respondent or partner if they would provide consent to ask the child if they would be willing for their class teacher to be contacted. All sections of this consent form | Child elements leaflet ("More information about the visit") and for Teacher Survey consent (in England and Wales only): Advance leaflet for parents ("What is the Child of the New Century age 11 survey?") |
<table>
<thead>
<tr>
<th>Consent form</th>
<th>Study elements covered</th>
<th>Purpose</th>
<th>Relevant respondent communication materials</th>
</tr>
</thead>
</table>
| Consent from child | All child data collection elements:  
  - cognitive Assessments and physical Measurements  
  - child self-completion questionnaire permission to contact the child’s teacher (England & Wales only) | This form was used to gain overall consent from the child for their participation in the study as a whole and to all individual child elements. | Advance leaflet for child (“How can I help with Child of the New Century?”) |
| Partner | Partner CAPI and CASI and data linkage | The purpose of this form was to gain consent from the partner to administer the survey, and also to gain permission to link to their economic records (data linkage). | Advance leaflet for parents (“What is the Child of the New Century age 11 survey?”) and data linkage leaflet (“Is there any other information we would like?”) (Plus potentially, partner letter) |

- permission to contact the child’s teacher (England & Wales only) had to be completed by the same parent or guardian.

There were several opportunities to complete this consent form. Consent could be asked immediately after the household grid and/or at the end of the main questionnaire (if not collected after the household grid). CAPI also asked interviewers to confirm that written consent had been obtained prior to administering each of the child elements.

- What the survey is for and what it involves as a whole;
- What participation is voluntary, that they don’t have to answer any questions they don’t want to, and that they can stop the interview at any time;
- That participation is voluntary, that they don’t have to answer any questions they don’t want to, and that they can stop the interview at any time;
- That the data will be kept confidentially.

The second part gained was used to consent to the cohort child data-collection elements: cognitive assessments, physical measurements and child self-completion questionnaire. In England and Wales only, the consent form also asked the child if they would be willing for their economic records to be linked.
The rates of consent in these different areas are shown below.

**MCS6 Consents**

All adult respondents had to give informed consent in writing to take part in the study. Written consent was also required from a parent or guardian for the interviewer to approach their child to ask for their consent. Parents were not asked to consent on behalf of their child. The exception was for the saliva sample, where a parent had to give consent for their child to provide a sample. The young person also had to give their own consent to participate in this element of the survey.

Interviewers were required to gain consent from the young person that was as fully informed as possible. In order to ensure this, young people needed to understand the full details of processes/ experience of participation (e.g. the burden/emotional impact) and as much as
could possibly be expected about the reasons for the study and how their data would be held and used.

Parents were provided with a booklet that explained the elements of the survey they would be asked to participate in, as well as the survey elements their child would be asked to take part in. Young people were provided with a booklet that explained the elements of the survey they would be asked to participate in.

There were five data collection consent forms – one for each parent for their own elements, one for a parent for the young person elements (excluding saliva), one for a parent for the young person saliva sample, and one for the young person themselves. The table below summarises the consents collected.

DSS Opt-out letter: English

Date 4 May 2001

Dear

CHILD OF THE NEW CENTURY
The Millennium Cohort Study

We are writing to invite you to take part in a new study of babies in the United Kingdom, which is going to be vitally important in getting good services for children growing up in the 21st century. The Centre for Longitudinal Studies at the Institute of Education, London University and the National Centre for Social Research are carrying out the study. The enclosed leaflet from the research team explains what it is about and why it is so important. The team has also told GPs and health visitors in your area about the study.

The study will collect information about the lives of up to 20,000 babies. This will be done by interviewing parents. It will not involve any medical examination or tests.

You may wish to know why your baby has been chosen from our records for ‘Child of the New Century’. Firstly, the study only includes babies born between 1 September 2000 and 30 November 2001. Secondly, you live in one of the areas chosen by chance to be part of the study.

An interviewer from the National Centre will be calling on you at home some time during the next month or so. He or she will explain more about the study, confirm whether you will be taking part, and arrange a convenient time for the interview.

Whether or not you take part will not affect your benefit entitlement or any dealings you have with DSS or Benefits Agency, now or in the future. Anything you tell the interviewer will be treated in the strictest confidence. No report will ever identify you or your family.

We hope very much that you will help with this important study. If, however, you do not wish to be interviewed to contact you, please let us know before 16 May 2001, either by writing to the FREEPOST address above or telephoning the Project Team during office hours (Monday-Thursday 9.00 a.m. to 4.30 p.m., Friday 9.00 a.m. to 4.00 p.m.) on 0800 015 032. If you do write or phone, please remember to give your name and the reference number at the top of this letter.

Thank you for your co-operation. We hope you will enjoy talking to the interviewer.

Yours sincerely

Katie Dodd
Advance letter

CHILD OF THE NEW CENTURY
The Millennium Cohort Study

The National Centre for Social Research is carrying out the interviews for this important new study of babies in Britain. This year and next we shall be collecting information about the lives of over 20,000 babies and their families on behalf of the Centre for Longitudinal Studies.

A short while ago you should have received a letter and leaflet letting you know about the study. We do hope you found this information useful.

Your interviewer, ________________, will visit you shortly to ask for an interview at a time convenient to you. Our interviewers always carry identification cards and will treat everything you say in strictest confidence.

We, too, will treat your answers as confidential and will not pass them on to anyone outside the research team.

Your interviewer should be able to answer most of the questions you may have about the study and will have spare copies of the information leaflet. However, if you have any further questions or concerns please do call us on 0800 783 5890 or email joanned@natcen.ac.uk. We would be happy to discuss them with you. We hope that you enjoy the interview.

Thank you for helping us with this study.

Yours sincerely,

Heather Joshi
Project Manager

Joanne Day
Interview Co-ordinator
Child of the New Century

About our survey

Is your baby special?

We think so. Your baby has been picked to be in a major new national survey that could make all the difference to people's lives in the future.

What is it like for children growing up in the 21st century? How will they get on at school? What helps them and what holds them back? The answers you give will help plan health care, education and child care services to really benefit children and their parents.

So can we come and ask all about you and your baby? The information you give us will be confidential under the law - you won't be named in the survey report, no names are made public.

Our interviewers are trained to ask everyone the same kind of questions about:

- your baby's birth and early development
- your family
- your beliefs and concerns about bringing up children today

The interview with Mum will last a little over an hour, and one with Dad, if available, about half an hour. The interviewer will not need to handle your baby, and there will be no medical tests.

To fill in the background we'll also ask you a bit about your own education and employment and about the home you live in.

Then we'll put together the answers from all the people we talk to throughout the United Kingdom. This will show what life is like right now for the Children of the New Century.
Do you have questions for us?

What's the point of this survey?
A fair question given all the fuss we're making about your baby! It's only by
gathering this kind of information - now and by following the babies as they
grow into adulthood - that government, parents and others can change
things for the better.

We've done surveys like this before - in fact Britain is the world leader in
this research. We found out, for example, that good health services for
mothers and children, good housing and proper food make a lasting
difference to health and success as children grow up. But this is the first
new survey for over 30 years.

Will this be the only interview?
We'd like to come back in a couple of years time and find out how things are
going. As your baby grows up we will be following up with interviews every
few years. That way we get a good idea of how your child is developing. This
information will give the government and other groups valuable clues about
how they can give people more help.

Once I've said 'yes' to this survey is my baby stuck with
it for life?
Absolutely not. You or your child can bow out at any time, although of
course we hope you stay with us. People generally seem to enjoy being part
of these surveys.

Who's this 'we' you keep talking about?
We are a research centre in the Institute of Education in London. We have
been chosen to carry out this survey because we have carried out other,
similar surveys and can be trusted to do a professional job. The interviews
are being carried out by the National Centre for Social Research who we
have chosen because they are experts in this field. Child of the New
Century is being funded by government and others.

If you would like more information about the survey,
there is a leaflet that goes into more detail.
Or you can talk to someone from the Study team on Freephone
0800 092 1250

For general information or advice to parents contact:
Parentline Plus - 0808 800 2222
or your local Citizens Advice Bureau
(the number will be in your local telephone directory)
Permission to Obtain Health Information

We have already asked about your pregnancy and the baby's birth. To make the information complete we would like to find out more about your pregnancy and your baby's birth and health from health records. These include birth registration, maternity or central records.

In most cases we would obtain this information from the summaries held by the Office for National Statistics and the Department of Health. If this is not possible, we will write to the hospital where your baby was born, or the maternity service attending the birth if the baby was born at home. Getting the baby's NHS number, with your permission, from these records would help us keep in touch with you.

To obtain any of this information we need your written permission for it to be released.

Like everything else you have told us, the health information collected from these records will be completely confidential. The information is used for statistical research purposes only. Names and addresses are never included in the results.

Please ask the interviewer about anything that concerns you or you can call the research team free on 0800 092 1230, or write or email to the addresses below.

I have read or heard the information leaflet (and introductory letter) about the Child of the New Century and have had the opportunity to ask questions.

I understand that all the information about my family and myself will be treated in the strictest confidence.

A. I understand that the Child of the New Century wishes to obtain information about my pregnancy and the baby's birth from birth registration, clinic, hospital or central records. I give permission for this information to be released to the Child of the New Century.

B. I give my permission for Child of the New Century to follow my baby's National Health Service registration where necessary.

• DELETE A OR B IF YOU DO NOT WISH TO GIVE PERMISSION FOR BOTH

Advance information sheet

Child of the New Century
Age three survey

Your child is still special

Two years ago, you were good enough to talk to us about your child who is now three years old, and about your family. You are now part of an important nationwide study, and you should have received some results of the survey of babies at 9 months. We are trying to find out what it is like to grow up in the 21st century. How will children get on at school? What helps them and what holds them back? The answers you have already given us will help plan health-care, education and child care services to bring real benefits to children and their parents. It will help even more if you agree to let us visit you again, now that your child is three, so that we can find out how he or she is growing up.

We’d like to know how you and your child are getting on

The information you give us will be confidential under the law - you won’t be named in the survey report, no information about you or your family as individuals will ever be published, and no names are made public.

Our interviewers are trained to ask questions about
- your child’s health and development
- your use of child care outside the home
- your beliefs and concerns about bringing up children today
- and to update the background information about your family, jobs and home.

They have also been given special training
- to measure your child’s progress by seeing what he/she can tell us about a simple set of picture games,
- to measure your child’s height and weight
- to help you collect saliva (spit) from your child

If you agree to our visit, the questions for Mum will last a little over an hour, and those for Dad, if available, about a quarter of an hour.

If you give permission, we will also need a parent to be present while your three-year old does the picture games which should take about 20 minutes. It will also take about 5 minutes, with your help, to measure your child’s weight and height. For this, shoes and socks must be taken off but there is no need for the child to be
undressed. In measuring height, the interviewer will need to hold your child's head.
In measuring weight, the interviewer or someone else may need to help your child
onto the scales although in most cases, this is not likely to be necessary. Altogether
the whole survey for the three year old will usually take about one and three quarter
hours for two parents combined, or one and a half hours for a single parent.
If you give permission, we would also like to collect a small sample of saliva (spit)
from your child. This is a simple and painless process, much like toothbrushing. The
saliva is collected by a specially designed gum swab which is rubbed gently on the
gums for about one minute.
The saliva contains substances which can tell us whether your child has had some
common infections that often go unnoticed by the child and their carers. This
information will help us find out whether those early infections protect the child
from developing asthma or allergies later on. The interviewer will post the specimen
to the laboratory. All we ask is that you help your child rub the sponge on their
gums. More information is available in the enclosed leaflet.
We would also like your permission to get information about any hospital admission
your three year old child might have already had, and those they might yet have up
to their seventh birthday. This information is the routine information that the Health
Service records on date and reason for hospital admission or treatment. This will be
very helpful, as it will help us identify how much hospital care is needed by the
Children of the New Century without having to ask each parent details of every
admission. We will not have any access to your child's personal medical records.

Your older children are important too
For many of you, your three year old who is part of the Child of the New Century is
not your only child. When our interviewers saw you last time, many of you wondered
why we were not asking any questions about your other children. This time we would
like to find out a little bit about any older brothers and sisters. May we ask you a few
questions? This will take some extra time, usually about 10 minutes, but this varies
between 5 and 24 minutes, depending on where you live, how many older children
you have and their ages. If you have three (or more) older children, our interviewer
will limit the extra time taken by only asking questions about two of them. When the
interviewer calls we will be able to let you know roughly how long it will take for
your family. If you have any children who are aged ten to fifteen, we would like
them to answer a few questions themselves about their lives. This will take them
about 10 minutes each. But if they don't want to or you don't want them to then, of
course, that's fine. You can also ask to make a separate appointment for this if you
prefer. If you can let us know the name of the school they attend, we expect to be
able to consult the official records on their attainment (SATS) and attendance
without having to take up your time over it.

Thank-you again for your help
We'll put together the answers you give with those given by all the other families we
talk to throughout the United Kingdom and add them to the picture that is being built
up about the study families when the children were babies. This will show how
the Children of the New Century are growing-up.
Do you have questions for us?

What’s the point of all this fuss?
A fair question, but we are asking for your time and trouble in a good cause! It’s only by getting this kind of information - now, and by following the children as they grow into adulthood - that government, parents and others can change things for the better. We’ve done surveys like this before - in fact Britain is the world leader in this type of research, following children from the last century who are now adults. We found out, for example, that good health services for mothers and children, good housing and proper food make a lasting difference to health and success as children grow up.

Will we be coming back again?
We’d like to come back in a couple of years time and find out how the Children of the New Century are getting on with school. We are also hoping to follow them every few years as they grow up. That way we get a good idea of how your child is developing. This information will give the government and other groups valuable clues about how they can give people more help.

Once I’ve said yes to this survey are we stuck with it for life?
Absolutely not. You or your child can leave the study at any time, although of course we hope you stay with us. People generally seem to enjoy being part of these surveys.

Who are we?
We are a research centre in the Institute of Education at London University. We have been chosen to run this survey because we have carried out other, similar surveys; and can be trusted to do a professional job. The interviews are being carried out by NOP, a research company who are experts in this field. Child of the New Century is being funded by ESRC (the governments’ Economic and Social Research Council) and other government departments from all the countries of the UK.

THIS IS YOUR SURVEY
If you would like more information about the survey at age 3, or about the results of the survey at 9 months, please contact the Study team on Freephone 0800 092 1250, visit the Study Website: http://www.childnc.net, email us at childnc@ioe.ac.uk, or write to the FREEPPOST address given at the bottom of this page.

Other useful contacts for general advice to families:
  Parenttime - Freephone 0808 800 2222
  Home-Start - Freephone 08000 68 63 68
or contact your local Citizens Advice Bureau (the number will be in your local telephone directory).

PLEASE TURN OVER FOR MORE INFORMATION ON THE SURVEY
Infections and later allergies

Do common infections in early childhood protect against later allergies?

Parents information sheet

It has been suggested that common and often unnoticed infections during early childhood may protect children against developing allergic diseases such as asthma and hay fever later in childhood and adult life. To find out whether this is the case we are asking all parents of the Child of the New Century children to help us find out whether their child has had any of these infections in the past.

We would like you to collect some saliva (spit) from your child. The saliva on the gums contains substances that tell us whether your child has had any of these infections before. We can collect the saliva using a gum swab. The gum swab is a sponge designed to be used like a toothbrush. Using it is a simple, painless process, much like brushing your teeth.

Collecting saliva
Saliva is collected by simply rubbing the sponge firmly along the gum at the base of the teeth, until the sponge becomes moist. This takes about one minute.

What happens to the saliva?
The interviewer will send it to the laboratory where the tests are done. Any sample left after testing is completed will be thrown away at the end of the study. No genetic tests will be done.

What happens to the results?
The infections we are measuring are common and often go unnoticed. The laboratory uses bar-coded labels (like the ones used in supermarkets) and has no way of knowing your child’s identity. Results will not be given back to individual families or GPs.

Your help would be gratefully appreciated and the results of this work would allow us to make a real contribution to child health.
Advance letters

Interviewer Number:
Our Reference:

Dear

Do you remember taking part in the Child of the New Century Study two years ago? Your help then was much appreciated and you should have received some first results of that survey in July 2003. Now your child is three we would very much like to come back and find out how your family is getting on. This time there are also some extra questions about older children in the family. I enclose an information sheet from the study team at the Institute of Education, which tells you more about the new stage of the study.

This year we have entrusted NOP Research with the task of making the visits to families and I am writing to ask you if one of NOP’s interviewers may arrange to visit you. The interviewer can explain more about what is involved.

It is entirely voluntary whether you take part in this round of the survey at all, and whether you take part in all of the survey or just some of it. If you are sure you don’t want to take part you can let us know by phone or letter, otherwise you can make up your mind when the interviewer contacts you.

We hope you will enjoy taking part, as most parents tell us they did the first time around. The interviewer would like to spend about an hour and half with you and your three-year-old. This will include interviewing you and you answering some questions yourself on the computer, around 5 minutes measuring your child’s height and weight, about 20 minutes seeing how familiar your child is with simple words, colours and numbers and also to collect a sample of saliva (spit). We would also like to spend about 15 minutes with your child’s father or father-figure if he is available, and devote extra time to older brothers and sisters (about 5 to 15 minutes, depending on circumstances), if you and they agree.

If you are willing, an interviewer will come and talk to you about whether you would like to take part in the survey and the most convenient time or times that this can be done. The interviewer will be calling in the next few days to talk about this. If you would like to make an appointment, or let us know that you are not interested please call the interviewer below, or the Institute on Freephone 0800 092 1250.

I do hope that you will be able to take part again in this important survey.

With kind regards,

[Signature]

Dear <Name>,

Your child is one of 19,000 special children born in the UK in 2000/2001 whose lives are being followed by the Child of the New Century study.

Children of the 21st Century: from birth to nine months

I am writing to tell you that the first book about the lives of the children of the 21st century has now been published. The main findings are covered by the enclosed magazine. I hope that you find this interesting. Additional copies of the magazine can be downloaded from the study website www.childnc.net.

Some families may wish to buy a copy of the book so I've enclosed an order form with this letter. We have agreed a special price with the publishers. The Policy Press, so that the book will cost you £17.69 instead of £24.99. If you want to find out more but don't wish to buy the book yourself, you can ask your local library to order a copy. We are sorry that we can't send you a free copy of the book but as there are such a large number of families in the study we cannot afford to do this.

We will send you some initial findings from the Age 3 Survey as soon as possible and, in the next year or two, we hope to produce a similar book documenting the lives of the children of the 21st century from nine months to 3 years.

Child of the New Century: Age 5 Survey

The next stage of the study will take place when your child is 5 and we hope that you will be happy to take part again. This time the interviews will be carried out by the National Centre for Social Research (NatCen), an independent research organisation which is an expert in this field. NatCen also did the interviews when the children were nine months old.

In about 3-4 months I will write to you again to give you more details about the Age 5 survey and to invite you to take part. An interviewer will then get in touch to find out whether you wish to be involved this time. It will, of course, be up to you whether or not to take part and the interviewer will be happy to discuss this with you.

If you have any questions, or would prefer not to be contacted about the Age 5 survey, please call us on Freephone 0800 092 1250. Finally, if you move to a new address in the next few months, please let us know as soon as possible so we can invite you to take part again.

Thank you again for the help you have given us so far with this important study.

With kind regards,

Professor Heather Joshi
Study Director
Advance letter: England and Scotland

Child of the New Century
Age 5 Survey

Dear <Parent 1 first name> [and <Parent 2 first name>],

Your child is one of 19,000 special children born in the UK in 2000/2001 whose lives are being followed by the Child of the New Century study. You may have taken part in the study when your child was 9 months old and again when he or she was aged 3.

Now that your child is aged 5 we would very much like to come back and find out how your family is getting on. I enclose a leaflet which tells you more about this latest stage of the study.

The Age 5 Survey is being carried out on our behalf by the National Centre for Social Research (NatCen), an independent research organisation. The interviewer named below will be in touch shortly to explain more about what is involved. It is, of course, up to you whether or not to take part and the interviewer will be happy to discuss this with you. If you would like to take part, she or he will arrange a convenient time to visit.

All interviewers have been through clearance procedures and carry an identification card with their photograph and the NatCen logo which is shown at the top right hand corner of this letter. Your answers will be treated in strict confidence in accordance with the Data Protection Act.

If you have any questions about the study or would prefer not to be contacted about the Age 5 Survey, please call Freephone 6800 783 5690, between the hours of 9.30 am and 5.30 pm.

With kind regards,

Heather Joshi, OBE
Study Director

Your interviewer on this study will be:

[Contact Information]
Child of the New Century
Age 5 Survey

When will we be coming back?
We are hoping to follow children of the new century every few years as they grow up and into adulthood. The next survey will take place in around two years, when your child will be 7 years old. You or your child can leave the study at any time, although of course we hope you will stay with us.

Who is carrying out the study?
The study is run by the Centre for Longitudinal Studies, which is a research centre in the Institute of Education at the University of London. We have been chosen to run the study because we have carried out other smaller surveys and can be trusted to do a professional job. The interviews for the Age 5 Survey are being carried out by the National Centre for Social Research (NatCen), an independent research organisation that is an expert in this field. NatCen also conducted the interviews when the children were 9 months old.

Child of the New Century is paid for by ESRC (the government’s Economic and Social Research Council) and other government departments from all the countries of the UK.

How can I find out more about the study?
If you would like more information about the Age 5 Survey, please contact the study team at NatCen on Freephone 0800 783 5990, or write to Child of the New Century, National Centre for Social Research, FREEPOST GL490 CM14 4ZJ. You can also visit the study website: www.childincent.org.uk or email us at childrens@natcen.ac.uk.

For general advice to families, contact Parentline Plus on Freephone 0800 088 2222 or your local Citizens Advice Bureau. The number will be in your local telephone directory.

Thank you again for your help.
Your child is special

The Child of the New Century is exploring what it is like to grow up in the 21st century by following around 19,000 children born in the UK in 1990/1991. Your child is one of those special children.

You may have helped us when your child was 9 months old and again when he or she was aged 3. We recently sent you a magazine with the main findings from the first book about the lives of the children of the new century and we will send you some initial findings from the Age 3 Survey as soon as possible.

The answers you have already given us are helping to plan health-care, education and child care services to bring real benefits to children and their parents.

We'd like to know how you and your child are getting on

Now that your child is aged 5, we would like to see what has happened since the last time that we contacted you. We know that this is an important time for both you and your child, especially as your child has recently started school.

If you agree to take part in this latest survey, the questionnaire for one parent usually takes about an hour, and those for the other (usually Dad) if he is available, about 20 minutes. We will ask questions about your family situation and the things you do with your children, your child's education and childcare, your child's activities and health, your parent's health, employment and housing.

Our interviewers have been given special training to measure your child's progress by using a set of assessments and to measure your child's height, weight and waist circumference. The interview will need to spend about 10 minutes with your child and will give you a separate leaflet with more details about these assessments and measurements.

Your older children are important too

We would like to ask you some questions about any older brothers or sisters your child has. This will take about 10 minutes, depending on how many older children you have and their ages. If you have any children who are aged 3 to 15, we would like to ask them to complete a paper questionnaire about their experiences. This will take each child about 10-15 minutes and no more than two children per family will be asked to do this.

What will happen to the information collected in the survey?

Your answers will be treated in strict confidence in accordance with the Data Protection Act. The information you provide will be used solely to build up a picture of life in the UK today and will not be released in any way that enables you to be identified.

Why is Child of the New Century so important?

We are asking for your time in a good cause. It is only by getting this kind of information - now and by following the children as they grow to adulthood - that government, parents and others can understand and act for the better. We've done surveys like this before: in fact, Britain is a world leader in this type of research. By following children born in 1946, 1956 and 1970 into adulthood we have found out, for example, that good health services for mothers and children and good housing and proper food make a lasting difference to health and success as children grow up. This study will help us produce a profile of how the children of the 21st century are growing up.
Second leaflet: England, Scotland and Wales
Interviewers can only assess your child if they have your written permission, and they will not be able to administer the assessments if your child:
- has a learning disability or serious behavioural problem (e.g. severe ADHD)
- is unable to respond in the required manner (e.g. painting, speaking)
- does not have the required level of English vocabulary.

Our interviewers cannot give specific feedback about how your child is performing. This is because these assessments are designed to measure the range of skills that all children at age 5 possess, rather than the ability of each individual child. When the results are available, the research team will be able to provide you with information on how all 5 year olds have performed, however we will not be able to provide this information at an individual level.

**First task (Story of Sally and Anne)**
This task involves learning to tell a story and is mainly used to familiarise children with the assessment procedure. It is also designed to assess a child’s ability to understand what a person believes, i.e. can they put themselves in someone else’s shoes.

**Second task (Picture Similarities)**
This task assesses your child’s reasoning ability. The child is shown a row of four pictures and is given a free-standing card with a fifth picture. The child is asked to place the free-standing card under the picture which shares an element or concept with the card.

**Third task (Naming Vocabulary)**
This is a verbal task that concerns knowledge of names. The child is shown a number of pictures and asked to say the name of each in turn.

**Fourth task (Pattern Construction)**
This task assesses your child’s ability to construct a pattern shown in a picture. For several items, interviewers will demonstrate how to construct the pattern before your child attempts to construct it. This exercise is timed using a stopwatch.

**Child measurements**
We would like to measure your child’s height, weight, and waist circumference. This will take around 10 minutes to complete and you will be given a record of the measurements. We would like you to be present during the measurements and the interviewer will need your help with some of them. Interviewers can only measure your child if they have your written permission and will not be able to measure your child if he or she cannot stand unaided.

Height and weight are used to calculate the child’s Body Mass Index (BMI), and the waist circumference is a measure of central body fat. These values can be used to identify children who are overweight or obese, and therefore at risk of short and long term physical and psychological consequences.

For the height and weight measurements, shoes and socks must be taken off and for the weight measurement, your child should remove any heavy clothing or items in their pockets.

The height measurement will be taken using a height measure called a stadiometer, a collapsible portable device. The interviewer will need to hold your child’s head in a particular position in order to make sure that your child’s maximum height is measured. For the weight measurement the interviewer will ask your child to stand on a special set of scales.

The waist measurement will be taken using a specially designed tape measure. For this, your child should be wearing light clothing, (girls, if possible, should avoid wearing a dress). Ideal and with your permission, we would like to take the measurement directly against the skin, in order to do this we would like the child to help us by lifting his/her top while we take the measurement. But if you prefer, the interviewer will measure your child’s waist over his or her clothes. In order to find the mid-point between your child’s ribs and hip bones, they may ask for your help with this.

We have asked about your child's health. To make this information complete we would like to find out more about your child’s hospital admissions and treatments from NHS health records.

We would like your permission to get information about any hospital admissions your child might have had since birth and those they might have up to their seventh birthday. This information is from the routine records that the National Health Service have on dates of admission to and discharge from hospital, diagnoses received and treatments given. This will be very helpful as it will help us identify how much hospital care your child has had without us having to ask you details of every admission. We will not have any access to your child’s personal medical records held by your GP.

We need your written permission for any information to be released. You do not have to give your consent for us to collect this data if you don't want to. Please ask the interviewer about anything that concerns you or you can call the research team at the Centre for Longitudinal Studies on FREEPHONE 0800 002 1250 or write to Child of the New Century, Institute of Education, University of London, FREPOCST LON20095, London WC1H 0BQ.

**Parental permission to release information from NHS records**

I have read or heard this information and have had the opportunity to ask questions. I understand that the information will be coded and used anonymously for research purposes only, and will not be linked to your child’s name or address or my name or address. I understand I may withdraw my consent at any time by contacting the investigators in writing at the address above, without giving any reasons.

I give my consent to use information from National Health Service records on dates of admission to and discharge from hospital, diagnoses received and treatments given from birth to age 7 years, for my child named below.

Please place a tick in one of the boxes to indicate whether or not you give consent. Yes ☐ No ☐

We have asked about your child’s health. To make this information complete we would like to find out more about your child’s hospital admissions and treatment from NHS health records.

We would like your permission to get information about any hospital admissions your child might have had since birth and those they might have up to their seventh birthday. This information is from the routine records that the National Health Service have on dates of admission to and discharge from hospital, diagnoses received and treatments given. This will be very helpful as it will help us identify how much hospital care your child has had without us having to ask you details of every admission. We will not have any access to your child’s personal medical records held by your GP.

We need your written permission for any information to be released. You do not have to give your consent for us to collect this data if you don’t want to. Please ask the interviewer about anything that concerns you or you can call the research team at the Centre for Longitudinal Studies on FREEPHONE 0800 002 1250 or write to Child of the New Century, Institute of Education, University of London, FREEPOST LON20095, London WC1H 0BQ.

Parental permission to release information from NHS records

I have read or heard this information and have had the opportunity to ask questions. I understand that the information will be coded and used anonymously for research purposes only, and will not include my child’s name or address or my name or address. I understand I may withdraw my consent at any time by contacting the investigators in writing to the address above, without giving any reasons.

I give my consent to use information from National Health Service records on dates of admission to and discharge from hospital, diagnoses received and treatments given from birth to age 7 years, for my child named below.

Please place a tick in one of the boxes to indicate whether or not you give consent:

We have asked about your child’s experiences at school. To make this information complete we would like to find out more about your child’s development at school from their teacher.

We would like to ask your child’s teacher to complete a questionnaire on your child’s social and personal, communication, language, literacy and mathematical development. This information will be very helpful as it will provide a full picture of your child’s development. We will not have access to any other information.

We need your written permission to approach your child’s teacher. You do not have to give your consent for us to do this and it will, of course, be up to your child’s teacher to decide whether or not to complete the questionnaire. Please ask the interviewer about anything that concerns you or you can call the research team at the Centre for Longitudinal Studies on FREEPHONE 0800 092 1200 or write to Child of the New Century, Institute of Education, University of London, FRIEPOI OND0065, London WC1H 0B.

Dear [Names of Parents],

Your child is one of the 19,000 special children born in the UK in 2000/2001 whose lives are being followed by the Child of the New Century Study.

**Results from the Age 3 Survey**

I am very pleased to enclose a leaflet with some more results from the Age 3 Survey. I hope that you find them interesting. Additional copies can be downloaded from the study website www.childnc.net. We will send you some initial findings from the Age 5 Survey as soon as possible.

**Child of the New Century: Age 7 Survey**

The next stage of the study will take place when your child is 7 and we hope that you will be happy to take part again. The interviews will be carried out by the National Centre for Social Research (NatCen), an independent research organisation which is an expert in this field. NatCen also conducted the interviews when the children were 9 months old and again when the children were 5 years old.

In a few months I will write to you again to give you more details about the Age 7 Survey and to invite you to take part. An interviewer from NatCen will then get in touch to find out whether you wish to be involved this time. It will, of course, be up to you whether or not to help us and the interviewer will be happy to discuss this with you.

If you have any questions or would prefer not to be contacted about the Age 7 Survey, please call us on Freephone 0800 092 1250. Please also call this number to let us know your new address if you move in the next few months so we can contact you to invite you to take part.

**Every tooth tells a story**

I would also like to invite your child to donate one (or more) of his/her teeth to the study. We can learn a lot about children from their teeth. As the children in the study are now 6 or 7, their milk teeth will have started to fall out recently or will begin to fall out over the next year or two. We hope that your child might be willing to donate one or more of these teeth to the study by posting them to us. The enclosed leaflet tells you more about why we are interested in children's milk teeth and what is involved.

It is, of course, up to you and your child whether or not to take part in this part of the study. If you are willing to help us in this way, please follow the instructions in the leaflet. We have enclosed a badge to thank your child for helping us to tell their story. We'd also like you to help us by checking that the number on the label of the plastic bag matches the reference number next to your child's name at the top of this letter. This is important to ensure that we can match the tooth to the right child when we receive it in the lab. If you have any questions, please call us on Freephone 0800 092 1250.

Thank you for the help you have given us so far with this important study. We very much hope that you will be willing to help us again.

Yours sincerely,

[Signature]

Professor Heather Joshi OBE, Study Director
Advance letter: England, Scotland

Child of the New Century
Age 7 Survey

Your child is one of 13,000 special children born in the UK in 2000/2001 whose lives are being followed by the Child of the New Century study. You may have taken part in the study when your child was 9 months old and again when he or she was aged 3 and 5.

Now that your child is aged 7 we would very much like to come back and find out how your family is getting on. I enclose a leaflet which tells you more about this latest stage of the study.

The Age 7 Survey is being carried out on our behalf by the National Centre for Social Research (NatCen), an independent research organisation. The interviewer named below will be in touch shortly to explain more about what is involved. It is, of course, up to you whether or not to take part and the interviewer will be happy to discuss this with you. If you would like to take part, she or he will arrange a convenient time to visit.

All interviewers have been through clearance procedures and carry an identification card with their photograph and the NatCen logo which is shown at the top right-hand corner of this letter. Your answers will be treated in strict confidence in accordance with the Data Protection Act.

If you have any questions about the study or would prefer not to be contacted about the Age 7 Survey, please call Freephone 0800 763 5890, between the hours of 8.30 am and 5.30 pm.

With kind regards,

Heather Joshi

Professor Heather Joshi, OBE
Study Director

Your interviewer on this study will be:
When will we be coming back?
We are hoping to follow the children of the new century every few years as they grow up and into adulthood. You and your child can leave the study at any time, although of course we hope you will stay with us. The next survey is likely to be when your child is aged 11.

Who is carrying out the study?
The study is run by the Centre for Longitudinal Studies which is a research centre in the Institute of Education at the University of London. We have been chosen to run this study because we have carried out other, similar surveys and can be trusted to do a professional job. The interviews for the Age 7 Survey are being carried out by the National Centre for Social Research (NatCen), an independent research organisation that is an expert in this field. NatCen also conducted the interviews when the children were 9 months old, and again when the children were 5 years old.

Child of the New Century
Age 7 Survey

How can I find out more about the study?
If you would like more information about the Age 7 Survey, please contact the study team at NatCen on Freephone 0800 763 3890, email childncnatcen.ac.uk or write to National Centre for Social Research, Freepost CL496, CM14 2JP.
You can also visit the Study website: www.childnc.net

For general advice to families, contact Parentline Plus on Freephone 0800 800 2222 or www.parentlineplus.org.uk or your local Citizens Advice Bureau (the number will be in your local telephone directory).

Thank you again for your help.
Your child is special.
The Child of the New Century is exploring what it is like to grow up in the 21st Century by following around 19,000 children born in the UK in 2000/2001. **Your child is one of these special children.**

You may have taken part in the study when your child was 9 months old and when he or she was aged 3 and 6.

You should have received some findings from the Age 3 Survey. We will send you some initial findings from the Age 6 Survey as soon as possible.

The answers you have already given us are helping to plan healthcare, education and child care services to bring real benefits to children and their parents.

Now that your child is aged 7, we would very much like to come back and find out how your family is getting on.

What would we like you to do?
If you agree to take part in this latest survey, the questions for one parent (usually Mum) will last about 1 hour, and those for the other (usually Dad) if he is available, about 20 minutes. We will ask questions about your family situation and the things you do with your children, child's education and childcare, your child's activities outside school and their health, your health, employment, income and housing. You can tell the interviewer if you don't wish to answer any of the questions.

What would we like your child to do?
We would like to measure your child's progress using a set of assessments and measure your child's height, weight, waist circumference and body fat percentage. Our interviewers have been given special training to do this and will need to spend about 45 minutes with your child to complete these assessments and measurements.

Now that your child is aged 7, we would also like to ask them to complete a paper self-completion questionnaire on their own. This should take about 10-15 minutes and is mainly about their experiences at school. The interviewer will be able to help your child if necessary.

We would like to measure your child's physical activity by asking your child to wear an activity monitor for a period of 7 days. The monitors will be sent after the interview and you will receive a summary of your child's activity. The interviewer will explain more about what is involved.

The interviewer will give you a separate leaflet with more information about what we would like your child to do. They will also give your child a leaflet about their participation in the study.

What other information would we like to collect?

We would like to contact your child's teacher to find out more about their experiences at school and collect some additional information about your family from routine records. We can only do so with your written permission, which the interviewer will ask you for separately for each information source. This may take about 10 minutes. The interviewer will give you a separate leaflet about this.

What will happen to the information collected in the survey?
Your answers will be treated in strict confidence in accordance with the Data Protection Act. The information you provide will be used solely to build up a picture of life in the UK today and will not be released in any way that enables you to be identified.

Why is the Child of the New Century so important?

We are asking for your time in a good cause. It's only by getting this kind of information - now, and by following the children as they grow into adulthood - that government, parents and others can change things for the better. We've done surveys like this before: in last Britain is the world leader in this type of research and by following children born in 1946, 1958 and 1970 into adulthood we have found, for example, that good health services for mothers and children, and good housing and proper food make a lasting difference to health and success as children grow up. This study will help us produce a profile of how the children of the 21st century are growing up.
**Child of the New Century**

**Age 7 Survey**

**Child assessments and measurements**

We would like to ask you to answer some questions on your own child's health and development. This is an important part of the survey, so please take the time to complete it carefully.

The survey will take about 20 minutes to complete. It is important that you answer all questions accurately to help us understand your child's health and development. The survey is confidential and all information will be kept strictly confidential.

We hope you will find the questions easy to answer. If you have any questions, or if you need help with the survey, please feel free to ask.

**Child self-completion**

The survey will take about 20 minutes to complete. It is important that you answer all questions accurately to help us understand your child's health and development.

We hope you will find the questions easy to answer. If you have any questions, or if you need help with the survey, please feel free to ask.

**Child assessments**

**First task (Story of Sally and Anne)**

This task involves listing to a story and is mainly used to familiarise children with the assessment procedure. It is also designed to assess a child's ability to understand what a person believes, i.e. can they put themselves in someone else's shoes?

**Second task (Word Reading)**

The task assesses children’s reading skills. The child is asked to read aloud a section of words presented on a card.

**Third task (Progress in Maths)**

This task assesses children’s numerical skills. The child is asked to perform various number-based tasks, such as doing some sums, looking at shapes and counting money.

**Fourth task (Pattern Construction)**

This task assesses your child’s ability to construct a pattern shown in a picture. For several items, interviewers will demonstrate how to construct the pattern before your child attempts to construct it. This exercise is timed using a stopwatch.

**Child measurements:**

We would like to measure your child’s height, weight, waist circumference and body fat percentage. This will take around 15 minutes to complete, and you will be given a record of the measurements. We would like you to be present during the measurements and the interviewer will need your help with some of them. Interviewers can only measure your child if they have your written permission.

Height and weight are used to calculate Body Mass Index which can be used to identify children who are overweight or obese. Waist circumference is a measure of central body fat and body fat percentage is a measure of fat distribution in the body.

For the height and weight measurements, shoes and socks must be taken off, and for the weight measurement your child should remove any heavy clothing or items in their pockets.

The height measurement will be taken using a portable height measure called a stadiometer. The interviewer will need to hold your child’s head in a particular position in order to ensure that your child’s maximum height is measured. For the weight and body fat percentage measurements, the interviewer will ask your child to stand on a special set of scales. The scales measure body fat by sending a weak electrical current around the body from one foot to the other. This is safe and painless, and the electrical current cannot be felt at all.

The waist measurement will be taken using a specially designed tape measure. For this, your child should be wearing light clothing (girls, if possible, should avoid wearing a dress). Ideally, and with your permission, we would like to take the measurement directly against the skin; in order to do this we would like the child to help us by lifting his/her top where no tape measure will be placed. But if you prefer, the interviewer will measure your child’s waist over his or her clothes. In order to find the correct place to take the measurement, the interviewer will have to find the midpoint between your child’s ribs and hip bones. They may ask for your help with this.

**Physical Activity Monitoring**

We would like to measure your child’s physical activity using an activity monitor. The Actigraph activity monitor is a small, lightweight device (like a pedometer) that is designed to measure physical activity by measuring and recording all your child’s movements. We would like your child to wear the activity monitor every day (from first thing in the morning until last thing at night) for 7 continuous days.

The activity monitor is worn on a belt around the waist. It should usually be worn on top of indoor clothing. If your child prefers her or she can instead wear it against the skin underneath their clothing. It does not interfere with daily life. The interviewer will show you a dummy activity monitor and explain how and when it should be worn.

If you and your child agree to take part in the activity monitoring, an activity monitor, belt and a further information leaflet will be posted directly to you within 6 weeks after the interview (unless you request a later date, for example if you are going on holiday). You will also be sent a timesheet on which to record the dates and times when the activity monitor is worn and a letter to give to your child’s teacher explaining why your child is wearing the monitor.
Child leaflet

Child of the New Century
Age 7 Survey

What would you like me to do?

Child of the New Century

What are my measurements?

- Your Name: ____________________________
- Date: ____________________________
- How tall am I?_____________________
- How much do I weigh?______________
- What is my body fat percentage?____
- What size is my waist?______________

When is the interviewer coming to see me?

- Time: ____________________________
- (in hours, minutes)

Is coming to see: ____________________________

- to ask you to answer some questions on your own, to see how you are growing and to measure your progress.
We want to ask you to help us with the
*Child of the New Century*.

**What is the Child of the New Century?**
It is the name of a survey of children.

**What is a survey?**
In a survey lots of people are asked questions about what they think or do. The person who asks the questions is called an interviewer.

**Why are you doing this survey?**
So we can find out what it is like to be a child growing up today.

**Why have you asked me to be in this survey?**
You have been specially chosen from all children who are the same age as you.

**What will I be asked to do?**
The interviewer will ask you to do 4 different things.

1. **Answer some questions on your own.**
The interviewer will give you a special booklet. We would like you to read and answer the questions on your own. You can ask the interviewer for help if you want to. The questions are about school, what you like doing and what you are like.

2. **Do some fun things with the interviewer to measure your progress.** The interviewer will ask you to listen to a story, read some words, do some sums and make some patterns.

3. **Be measured by the interviewer to see how you are growing.** The interviewer will find out how tall you are using a special ruler, how much you weigh and what your body fat percentage is using some scales and what size your waist is using a tape measure.

4. **Wear an activity monitor.** An activity monitor is a small red plastic box which measures how much you move around. You wear the activity monitor on a belt round your waist for a week.

**Do I have to do these 4 things?**
No. If you do not want to do some or all of these 4 things, you do not have to. The interviewer will ask one at a time if you want to do these 4 things. You can tell the interviewer if you do not want to do it.
Child of the New Century
Age 7 Survey

Information from other sources

We would like to obtain some additional information about your study child from their teacher and about your family from records which are routinely collected by government departments or agencies and other public sector organisations. This leaflet explains in detail what information we would like to collect, from which sources, why we would like to collect the information and why we would like to do this. This is summarised in the table below.

<table>

This leaflet will be sent to you and your partner separately for permission to release your own records. In order to help us obtain this information, it would be useful to have the National Insurance Number for you and your partner. This can be found on payslips from your employer, or on your annual P60 return. This number will be treated in strict confidence in accordance with the Data Protection Act and only used to access the routine records. It will not be included in the data which is made available to researchers.
We seek your written permission to approach the child's teacher to obtain information from routine records. The interviewer will ask you for your permission for each of these sources separately. It is completely up to you which permissions you choose to give. You can withdraw your permission at any time in the future. Choosing not to give your permission or withdrawing it in the future will not affect your participation in the study.

All information obtained from these sources will be treated in strict confidence in accordance with the Data Protection Act and used for research purposes only.

In order to access these routine records, we will provide a limited amount of information about your family to the holder of the records (e.g., full name, sex, date of birth, address). This information will only be used for accessing the records. No information that you have provided in the Child of the New Century study will be disclosed to these sources for any other purpose.

Information from your child's school teacher

We would like to contact your child's class teacher to find out more about your child's education and behaviour at school.

We would like to ask your child's teacher to complete a questionnaire on various aspects of your child's education. The questionnaire covers some details about your child's teacher, their teaching methods and class groupings and the other children in your child's class. There are some questions about your child's behaviour, abilities and any special educational needs. Additional support needs and your involvement with the school. This information will provide a fuller picture of your child's education.

It is entirely up to the teacher whether they complete the questionnaire, but we require your written permission to approach them. The questionnaire will be sent to them at school by post a few months after the interview. The interviewer will ask you for the teacher's full name and the name and address of the school. We will also write to the head teacher of the school to let them know that one of the teachers in their school has been asked to take part in this study.

The information that the teacher gives about your child will be treated in strict confidence in accordance with the Data Protection Act. We have no intention of identifying you from the information given about your child.

Information from routine records on education

We would like to collect information from routine records on education about your child's performance at school and the characteristics of pupils in your child's school, throughout their compulsory education.

By performance at school, we mean the results that they get when they do national tests or the formal assessments that their teachers make about their performance in different subjects at the end of particular years. The exact information varies but we mean things like Key Stage assessments and GCSEs in England, Wales and Northern Ireland and A-levels and Standard Grades in Scotland.

The information on the characteristics of pupils in your children's school also varies by country but may include ethnicity, special educational needs, additional support needs, attendance, home-school co-operation and pupil first entered and left the school. This information will be collected for your children as well as other pupils in the school. We may be able to use this information to help keep in touch with your family if you move in the future.

For England, this information is held by the Department for Children, Schools and Families (DfCSF), and for Wales by the Local Government Data Unit of the Welsh Assembly. In Northern Ireland, some of this information is held by the schools and some is held by the Department of Education. From 2009 onwards, some of this information will be held by a new statutory organisation called the Education and Skills Authority (ESA) in Northern Ireland. For Scotland, some of this information is held by local education authorities and some is held by the Education Directorate of the Scottish Government.

We would like to obtain this information from these routine education records about:

- Your study child from the start of their compulsory education up to the end of their compulsory education at age 16
- Your study child's brothers and sisters (aged under 14) from the start of your compulsory education up to the end of their compulsory education at age 16

We will only ask you for your partner's permission to obtain this information for your study child and their partner's permission if they are under age 16, as this is the end of compulsory full-time schooling. Having such information enables us to draw a more complete picture of educational progress within families and will allow researchers to examine, for example, what impact the educational progress of a brother or sister has on your study child's progress.

Information from routine medical and other health-related records

The National Health Service (NHS) maintains information on all patients, accessing the health services through routine medical and other health-related records. These health records are held within statutory health databases, which may record information about:

- Admissions or attendances at hospital (including dates of admission, discharge or attendance, diagnosis received, treatments given, surgical procedures)
- Visits to your family doctor or other health professional e.g. midwives
- Records of specific conditions such as cancer or diabetes
- Prescriptions given

We would like to get information from these routine medical and other health-related records about you, your partner and your child's brothers and sisters as well as your study child. This will mean we have a much more complete picture of health and

Age 7 Survey
Consent form
MAIN RESPONDENT

Name of respondent (print) ……………………………………………………………………………………………………………

PART A: Interview and self-completion

I give my consent to the interviewer named below to my participation in the Age 7 Survey of the Child of the New Century by (tick one for each):

a) Answering questions put to me by the interviewer

   Yes   No

b) Completing a questionnaire

   Yes   No

Confirmation
I have read the letter of invitation and the information leaflet about the Child of the New Century: Age 7 Survey. I have discussed any outstanding questions with the interviewer named below and I wish to participate in the survey. I understand that I can stop the interview and/or questionnaire completion at any point or decline any question, and that all information will be treated in the strictest confidence in accordance with the Data Protection Act, and used for research purposes only.

Signed by respondent …………………………………………………………………………………………………………… Date ……………………………

PART B: Health and economic records

Permission to release information from routine health records
I give my permission for information from my routine health records (as detailed in the leaflet about information from other sources) to be released to the Child of the New Century study.

   Yes   No

Permission to release information from routine economic records
I give my permission for information from my routine economic records (as detailed in the leaflet about information from other sources) to be released to the Child of the New Century study.

   Yes   No

National Insurance Number: ……………………………………………………………………………………………………………

Confirmation
I have read or heard the information leaflet about information from other sources and have had the opportunity to ask questions. I understand that the information released will be treated in strict confidence in accordance with the Data Protection Act and used for research purposes only. I understand that this consent will remain valid unless revoked by me in writing and that I may withdraw my consent at any time by contacting the Child of the New Century in writing to the address below, without giving any reasons.

COHORT CHILD
TEACHER SURVEY CONVERSATION

We have asked about your child’s experiences at school. To make this information complete we would like to find out more about your child’s development at school from their teacher.

We would like to ask your child’s teacher to complete a questionnaire on your child’s social and personal, communication, language, literacy and mathematical development. This information will be very helpful as it will provide a full picture of your child’s development. We will not have access to any other information.

We need your written permission to approach your child’s teacher. You do not have to give your consent for us to do this and it will, of course, be up to your child’s teacher to decide whether or not to complete the questionnaire. Please ask the interviewer about anything that concerns you or you can call the research team at the Centre for Longitudinal Studies on FREEPHONE 0800 092 1250 or write to Child of the New Century, Institute of Education, University of London, FREEPOST LORO9895, London WC1H 08R.

Permission to approach my child’s school teacher

I have read or heard this information and have had the opportunity to ask questions. I understand that the information collected from my child’s school teacher will be coded and used anonymously for research purposes only, and will not include my child’s name or address or my name or address.

I give my consent for my child’s school teacher to be asked to complete a questionnaire about my child’s social and personal, communication, language, literacy and mathematical development. I understand that the information will be obtained directly from the teacher and that they are under no obligation to complete the questionnaire.

Pre-notification mailing

Dear [Salutation],

Your child is one of the 19,000 special children born in the UK in 2000/2001 whose lives are being followed by the Child of the New Century study.

Ten years of Child of the New Century

The study has now been going for 10 years. I am pleased to enclose a leaflet summarising what it has covered over the decade from 2001-2011 and how it has helped to influence policy and improve children’s lives. I have recently taken over from Professor Heather Joshi as the Director of Child of the New Century and am delighted to be involved with such an important study. It is a privilege to be writing to you, who have made it possible. I hope you enjoy reading the leaflet. Additional copies can be downloaded from the study website www.childnc.net. You can also download a version of the leaflet in Welsh.

I also include a card for your child. This is to thank them for their contribution to Child of the New Century so far. I would be grateful if you could pass it on to them.

Child of the New Century: Age 11 Survey

The influence of the study will increase as it continues to follow the children’s lives as they grow up. The next stage of the study will take place in 2012, when your child is around 11 years old. The interviews will be carried out for the first time by Ipsos MORI, an independent research organisation. We are excited to be working with Ipsos MORI on the Age 11 Survey. They have a lot of experience and expertise in surveying families with children.

In a short while, I will write to you again to give you more details about the Age 11 Survey and to invite you to take part. An interviewer from Ipsos MORI will then get in touch with you. We very much hope you and your child will feel able to take part again. But it will, of course, be up to you whether or not to help us at the time. The interviewer will be happy to discuss this with you.

If you have any questions or would prefer not to be contacted about the Age 11 Survey, please call us on Freephone 0800 092 1250 or email childnc@ioe.ac.uk. Please also let us know your new address if you move, so that we can reach you to invite you to take part.

Thank you for the help you have given us so far with this important study. I look forward to keeping in touch with you as it goes forward.

With kind regards,

[Signature]

Child of the New Century
Age 11 Survey

Dear

Your child is one of 19,000 special children born in the UK in 2000/2001 whose lives are being followed by the Child of the New Century study. We have visited the children when they were 9 months old, and at ages 3, 5 and 7. Now that your child is in the last year of primary school, we would very much like to visit you to find out how your family is getting on. Your continued participation in the study is very important to us.

The enclosed leaflet tells you more about the latest stage of this important study. We also enclose a letter and a leaflet for your child to read. Where two parents (or a parent and their partner) are living with the child, we would like to interview both of you as well as your child.

The Age 11 Survey is being carried out by Ipsos MORI. All interviewers are fully trained. They carry an identification card with their photograph and the Ipsos MORI logo. The logo is at the top of this letter.

The interviewer named below will be in touch shortly to ask if you would be willing to take part. It is, of course, up to you whether or not to take part and the interviewer will be happy to discuss this. If you agree, your interviewer will arrange a convenient time to visit. You can also get in touch with them directly to arrange an appointment. Their phone number is at the bottom of this letter.

If you have any questions about the survey or would prefer not to be contacted, please call James Bill at Ipsos MORI on 0800 238 5446 between 9:30 am and 5:30 pm (Monday to Friday).

With kind regards,

For the Child of the New Century:

Ref:

Will you help us with Child of the New Century?

Dear

You are one of 10,000 special children in the UK. You have been chosen out of all the children your age to help us find out what it's like growing up today.

We have visited the Children of the New Century when they were babies and when they were 3, 5 and 7 years old. We want to find out what your life is like now.

Your family have helped us before. We would be really grateful if you could help us again this time.

By taking part in Child of the New Century survey, you help to make things better for all children in the future.

I've included a leaflet for you. Please read the leaflet to find out more about what the survey will be like. It will help you decide whether you want to take part.

If you and your family are OK to take part, an interviewer will come to your home to do the survey with you. Your interviewer is a man/woman called:

----------------------------------------------------------------------------------------------------------------------------------

The interviewer works for a company called Ipsos MORI. This company does lots of surveys with different people. This survey is for a university called the Institute of Education.

I hope you will help us again with this important survey.

Professor Lucinda Platt
Survey Director, Institute of Education
Child elements leaflet
DOES MY CHILD HAVE TO DO ALL OF THESE THINGS?
We would like your child to do all of these things, but they may not be the same for everyone. They can be taken apart and added back together.

HOW CAN I FIND OUT MORE ABOUT THE SURVEY?
If you would like more information about the survey, please email: info@childofthefuture.org

WHAT IF MY CHILD HAS QUESTIONS AFTERWARDS?
Your child will be asked to answer questions about the topics covered in the survey. If your child has any questions, they can contact the research team by email or phone:

Thank you for your help.
Ipsos MORI

WHAT DOES THE QUESTION BOOKLET INVOLVE?
We would like to ask your child to answer some questions on their own by telling them in a question booklet. This is also done in schools.

The questions are about a lot of different things, including:
- Their family and friends
- School
- The activities they do outside school
- How they feel
- What they think about things

We are interested in the questions about things that all children of this age and have seen.

WHAT ARE THE ASSESSMENTS DOING?
We would like to measure different aspects of your child's development using three assessments. These are not like school tests. They help us understand how children of this age and have seen. Our interviews are specially trained in carrying out these assessments in a structured way.

One of the assessments is taken from the Child and Adolescent Brain Science (CABS), which is widely used in educational psychology. The other two assessments are from a computer game and are developed by Cambridge Cognition who are experts in this area. These assessments take about 20 minutes.

CHILD OF THE NEW CENTURY

MORE INFORMATION ABOUT THE VISIT

WHAT WOULD YOU LIKE YOUR CHILD TO DO?
- Fill in a question booklet
- Complete three assessments of learning
- Be weighed and measured

Afterwards, your child will receive a small gift and a certificate for taking part. The visit takes about 1 hour for the child and about 1 hour for the child and another 1 hour for the whole family.

The rest of the families tell us what we are most interested in your child to do and give more information about the visit.

First assessment (Verbal reasoning)
This measure children's verbal ability. Your child will be asked some words and asked to write down how they think the words should be sorted. The assessment takes about 15 minutes.

Second assessment (Memory)
This measure children's memory ability and how well they work. The assessment takes about 15 minutes.

Third assessment (Problem-solving)
This measure children's ability to make decisions. They will need to solve various puzzles. The assessment takes about 20 minutes.

HOW DO YOU MEASURE YOUR CHILD?
We would like to measure your child's height, weight, and body fat percentage. We would also like to measure how your child's height compares to other children of the same age and to other children of the same height and body fat percentage.

The height measurement will be taken using a device called a stadiometer. The researcher will ask you to stand on a certain height. The result will be recorded in centimeters and then compared to other children of the same age.

The weight measurement will be taken using a device called a bathroom scale. The researcher will ask you to stand on a certain weight. The result will be recorded in kilograms and then compared to other children of the same height and body fat percentage.

The body fat percentage measurement will be taken using a device called a bioelectrical impedance analyzer. The researcher will ask you to stand on a certain weight. The result will be recorded in percentages and then compared to other children of the same height and body fat percentage.

The measurements will be taken within a few weeks and you will be given a certificate for participating.

Thank you for your help.
Ipsos MORI

85
IS THERE ANY OTHER INFORMATION WE WOULD LIKE?

OTHER INFORMATION

Information routinely collected by government departments can help us understand much more about your experiences and how to support families. If linked to the answers you have given us, we will ask your permission to link your data in this way.

Please read on...
WHAT AM I BEING ASKED TO GIVE PERMISSION FOR?

The Department for Work and Pensions (DWP) keeps records of everybody’s benefit claims and any periods people spend on employment programs.

Child of the New Century Study would like to add these records to the responses you have given to this study.

WHAT WILL HAPPEN IF I GIVE PERMISSION?

1) Child of the New Century Study will give the DWP your name, address, sex and date of birth and National Insurance Number.
2) The DWP will use these details to identify the correct records it holds about you.
3) The DWP will send your DWP records to Child of the New Century Study.
4) The DWP will not keep any of the personal information passed on to them.
5) Child of the New Century Study will add the DWP records to your study responses.
6) Your personal information (e.g. name and address) will be removed before any research is done.

WHAT WILL THE RESEARCH BE USED FOR AND WHO WILL USE IT?

Like your study responses, the additional information would be used by professional academic and social policy researchers for non-commercial research and statistics.

Any sensitive information would only be made available to them under restricted access arrangements which make sure that the information is used responsibly and safely.

Names and addresses are never included in the results and no individual can be identified from the research.

The data will not be used to work out whether any individual is claiming benefits they should not be and will not affect any current or future claims for benefits.

WHAT IF I DO NOT WANT TO GIVE PERMISSION?

If you don’t want to give your permission for this, that is fine. You can still take part in the rest of the survey.

WHAT IF I CHANGE MY MIND?

You can withdraw permission at any time for your DWP records to be added to your study answers.

You can still continue to participate in the study.

WHO DO I CONTACT?

If you would like any further information or want to withdraw your permission, please contact us at:

Tel: 0800 092 1250
Email: childnc@ice.ac.uk

Thank you for your help

Ipsos MORI 10.0303584/34
I’ve helped with Child of the New Century - What now?

What if I want to talk to someone about the things in the survey?

We hope you enjoyed taking part in the survey. But if you are worried, upset or have questions about anything in the survey or anything else in your life, the first person to talk to is one of your parents.

If you can’t or don’t want to speak to your mum or dad, you can talk to an older brother or sister, any other grown-up in your family, a teacher, someone else at school, or any other adult you trust.

You can also contact ChildLine about anything. No problem is too big or too small. This is a special helpline for children to ring if they want to talk about something or need help. You can phone them on 0800 1111. If you’re deaf, hard of hearing or speech impaired textphone 0800 400 222. Calls are free from landline phones and mobile phones. You can phone at any time of the day or night. You can also look at their website: www.childline.org.uk.
How can I find out more?

About the survey
If you have any other questions about the survey, you can contact James at Ipsos MORI; at childnc@ipsos.com, or on Freephone 0808 238 5446 (calls from mobile phones may not be free).

About Child of the New Century
If you want to know more about Child of the New Century as a whole, you can look at the website: www.childnc.net, phone 0800 092 1250 or email childnc@ioe.ac.uk.

What will happen to the information about me?
The interviewer will send your answers and measurements back to the company doing the survey. They will not have your name and address on, so no-one who sees them will know whose they are. They will be put together with the answers and measurements collected from the other children. Together they will be used to find out about children your age.

Will we be coming back?
We hope to visit you again in a few years. It is really important for us to visit the same children as you grow up, to find out what has changed and what is the same. You can decide when we come back whether or not you want to help with the next survey.

Thank you very much for your help!
By taking part in Child of the New Century you have helped to make things better for children in the future.
Partner letter

Child of the New Century - Age 11 Survey

Date: ....................................

Dear ........................................

A short while ago, I sent you and your partner some information about the Child of the New Century Age 11 Survey. Today I have been talking with your partner and child.

I would very much like to speak to you too.

The interview will only last around 25 minutes. It is very important for this study that we speak to both parents or both adults living with the child, whenever possible. It is only by interviewing both of you that we can build up a full picture of the lives of children of this age.

I can interview you at a time that is convenient for you. I will call back to arrange a time. If you would prefer to call me to arrange a time please contact me on the number below.

The leaflets I sent to you and your partner tell you more about the study.

If you want any further information please call James Bill at Ipsos MORI. James can be contacted on 0800 238 5446 between 9:30 am and 5:30 pm (Monday to Friday). You can also let him know if you would prefer not to be contacted.

I hope you can help with this important study.

Best wishes,

...........................................

Consent form (Child) – England and Wales

Child of the New Century – Age 11 Survey

CONSENT FROM CHILD

(TO BE COMPLETED BY INTERVIEWER)

Name of child (print) ________________________________

INSTRUCTIONS FOR COMPLETION

***YOU MUST COMPLETE: CONSENT FORM “CHILD ELEMENTS” BEFORE COMPLETING THIS FORM***
This is because PARENTAL CONSENT must be gained prior to asking the child’s consent for any aspect.

SECTION 1 (Overall consent to participation): ***YOU MUST ALWAYS COMPLETE SECTION 1 BEFORE SECTIONS 2-5***.

SECTIONS 2-5 (Child consent to individual child elements): These can be completed in any order, and at different times, but AFTER SECTION 1, and BEFORE you carry out the relevant element.

EACH SECTION OF THE CONSENT FORM is designed to be administered in conjunction with the relevant section of the child leaflet. (For ease of reference, relevant leaflet sections are indicated in brackets)

FOR YOUR INFORMATION, BEFORE PROCEEDING WITH THE FIRST STAGE OF CHILD CONSENT, CHECK IF THE CHILD HAS READ THE LEAFLET (“How can I help with Child of the New Century?”) IN ADVANCE.
1. Overall consent to participation

YOU MUST MAKE SURE THAT THE CHILD UNDERSTANDS AND AGREES TO THE FOLLOWING POINTS BEFORE YOU START THE FIRST CHILD ELEMENT:

i) What the survey is for and what it involves as a whole, specifically...

a) That the survey is to help understand what it is like to be a child of your age growing up, and it will help improve things for children in the future (LEAFLET SECTION: “What is it?” “What’s it for?”)

READ OUT:
Before we start, I want to tell you about this survey. As you know, you are one of those special children who have been chosen out of all of the children in the country of your age. We have visited the Children of the New Century when they were babies and when they were 3, 5 and 7 years old. We want to find out what your life is like now.

It’s to find out what it’s like to be growing up in England, Scotland, Wales and Northern Ireland today. By taking part in Child of the New Century you have already told us a lot about how to make children’s lives better. By taking part again, you will help to make things better for all children in the future.

b) That we will be finding out about them by asking them to fill in some questions and do some different activities, and by asking some questions to their parents and possibly their teacher.

(LEAFLET SECTION: “What will it be like?” “Who else is being asked to be in the survey?” and “What will I have to do?”)

READ OUT:
We want to understand what it is like to be you. I will ask you to do some different things. You can decide whether or not to do each one - I will explain everything to you clearly so it is easy for you to understand what you have to do. If you want to ask any questions or if you don’t understand anything then you can tell me as we go through.

We will also ask your parent(s) some questions. We also want to ask your class teacher some questions, if you are OK with that.

ii) That participation is voluntary (LEAFLET SECTION: “Do I have to do these things?”)

READ OUT:
If there is an activity that you do not want to do, you can just tell me, and we won’t do it. And that’s OK. Even though your (mum/dad) said you would be allowed to do the survey, you still do not have to do something if you do not want to.

You can also skip any questions that you don’t want to answer or stop at any time. It’s OK to change your mind once you have started too, you can just tell me and we will stop.

iii) That data will be kept confidentially (LEAFLET SECTION: “What will happen to the information about me?”)

READ OUT:
I will send your answers and measurements back to the company doing the survey. They will not have your name and address on, so no one who looks at them will know whose they are. They will be put together with the answers and measurements collected from the other children. You do not have to tell anyone your answers. It is up to you whether you want to tell your parents your answers.
2. Child questionnaire ("Answer some questions about your life")

**READ OUT:** Now I am going to give you a booklet of questions to fill in on your own. The questions are about lots of different things. These things include your family and friends, school, the things you do outside school, the area you live in and how you feel. If there are any questions you don’t want to answer, that is OK. You can just skip them. The booklet isn’t a test. We just want to know what you think about things.

I will explain how to fill the booklet in. I can help you if you find it difficult to do it on your own. I can give you some headphones and the questions will be read out to you.

When you have finished the booklet you will put it into an envelope so I can’t see your answers or show them to anyone. I will send it to the company doing the survey. When they get your booklet, it will not have your name and address on it. So no-one who sees it will know whose answers they are. You don’t have to show or tell your answers to anyone, including your parents.

You can take as long as you need to fill it out but it usually takes about 30 minutes.

Are you OK to fill in the question booklet answering some questions about your life?  

Yes  No  N/A – no parent consent given

**INTERVIEWER CHECK:** Ensure that the child understands that they can change their mind once they’ve started or skip any bits they don’t want to answer. Ensure that the child has asked any questions they want to.

3. Child assessments ("Do three activities to find out how you think")

**READ OUT:** Now I’m going to ask you to do some activities to find out how you think. You and I will sit down together with my computer. I will ask you to tell me how some words go together. I will also ask you to do two fun activities on the computer. The first computer activity will see how well you can remember things. The second is about how you make up your mind. For these two activities you will need to sit near to the computer and touch the screen – I’ll explain everything as we go along.

This will take about 25 minutes.

Are you OK to do these three activities with me?  

Verbal similarities  Memory task  Decision making task  N/A – no parent consent given

**INTERVIEWER CHECK:** Ensure that the child understands that they can change their mind once they’ve started or skip any bits they don’t want to do. Ensure that the child has asked any questions they want to.

4. Child measurements ("Be measured to find out how you are growing")

**READ OUT:** Now I will measure how tall you are. I will also see how much you weigh and how much of your body is made of fat. To do this I will use special scales. I can give you a copy of your measurements if you want but you don’t have to have a copy if you don’t want.

This will take about 10 minutes.

Are you OK for me to measure your height and weight and how much of your body is made of fat?  

Height  Weight  Body fat  N/A – no parent consent given

**INTERVIEWER CHECK:** Ensure that the child understands that they can change their mind once they’ve started or skip any bits they don’t want to do. Ensure that the child has asked any questions they want to.
5. Approaching the child’s teacher ("Who else is being asked to be in the survey")

READ OUT: We’d like to send a short question booklet to your class teacher. This will tell us more about you and your class. Your teacher doesn’t have to take part if they don’t want to.

Are you OK for us to contact your teacher? Yes ☐ No ☐ N/A — no parent consent given ☐

INTERVIEWER CHECK: Ensure that the child understands that it’s ok not to contact their teacher if they don’t want us to. Ensure that the child has asked any questions they want to.

Interviewer confirmation

I confirm the child understands what the survey involves; that they have asked all questions they have about the survey and I have answered them to the child’s satisfaction; that the child is aware they only have to do activities they want to do; and that the child is aware they can stop taking part and change their mind at any time.

Letter from parent to teacher

Child of the New Century - Age 11 Survey
Letter for Class Teacher

Dear ...........................................................

My child ..................................................

is taking part in the Age 11 Survey of the Child of the New Century study.

This important national study is exploring what it is like to grow up in the 21st Century by following over 19,000 children born in the UK in 2000/2001 throughout their lives. Previous surveys have taken place when the children were 9 months old, and at ages 3, 5 and 7. An important part of the study involves collecting information on various aspects of the child's education at school from their class teacher.

The Age 11 Survey is taking place during 2012, when the children are 11 years of age and in their last year of primary school. My child and I have already taken part in this survey.

I am writing to let you know that I have given my written permission and my child has agreed for you to be invited to take part in this survey too. As part of this I have provided your name and the school name and address. If you do participate in this survey, please be assured that your responses will not be shared with me or my child.

Child of the New Century is being carried out by Ipsos MORI on behalf of the Centre for Longitudinal Studies at the Institute of Education. Ipsos MORI is an independent research organisation. All information you provide will be treated in the strictest confidence in accordance with the Data Protection Act and will be used for research purposes only.

You do not have to do anything for now. Ipsos MORI will send you a questionnaire through the post and more information about the study in the near future. If you have any questions, please contact James Bill at Ipsos MORI on 0808 238 5446 between 9:30 am and 5:30 pm (Monday to Friday). For further information about the study in general, you can visit the study website: www.childnc.net

With kind regards,

Name ...........................................................................................................................

Signed .................................................................................................................. Date ..................................

Dear Study Member,

My name is Emila Fitzsimons, and I’m the Director of Child of the New Century. I recently sent you some information about the study, and why your voice is so important and unique. I hope you found it interesting – and that you liked the small gifts too!

Child of the New Century is the only study in the UK that shows us what life is like for young people growing up in the UK today and that has followed your lives since you were babies. This makes it one of the most important and influential studies of its kind, because to understand how we got to where we are, we need to understand the past as well as the present.

Researchers worldwide use information in the study to describe different aspects of your lives. This research then helps improve decisions that policymakers make on behalf of young people. I’ve enclosed a short leaflet along with this letter. It tells you what you all told us at age 11 about different aspects of your lives. I hope you find it interesting. There is also more on the website, www.childnc.net.

The next survey is planned for when you are 14 years old, in 2015. It has lots of new things this time round! We will write to you again soon to give you more details about it and to invite you to take part. Like last time, the survey will be carried out by the company Ipsos MORI. We very much hope you will take part again. Of course, it is up to you and your parents to decide, and the interviewer will be more than happy to discuss it with you too.

If you have any questions, or would prefer not to take part, please call us on Freephone 0800 082 1250, email us at child@ioe.ac.uk, or write to us at FREEPOT RTKO-KLIU-RSBH, Child of the New Century, 20 Bedford Way, London, WC1H OAL.

You can keep up to date with the study through our website at www.childnc.net. You’ll find lots of information about taking part and what we’ve learned – you can even check out our new animated video about the study! You can also follow us on Twitter @childnewcentury and Facebook www.facebook.com/childofthenewcentury.

I very much hope that you will be happy to help us with this important study.

With my best wishes,

[Signature]

Professor Emila Fitzsimons, Study Director
Dear Parent(s),

Your child is one of the 19,000 children born in the UK in 2000/2001 whose lives are being followed by Child of the New Century.

The study has now been going on for nearly 14 years! I am pleased to enclose a booklet containing some initial findings from the previous survey, carried out three years ago when your child was age 11. I hope you enjoy reading it. There is also more on the website, www.childnc.net.

I have recently taken over from Professor Lucinda Platt as the Director of Child of the New Century and am delighted to be taking forward such an important and influential study. Without your contribution, the study would simply not happen, and I wish to extend a heartfelt thanks to each and every one of you for participating over the years.

The influence of the study will increase as it continues to follow your children’s lives as they grow. The next stage of the study will take place in 2015, when your child is 14 years old. Like last time, the interviews will be carried out by Ipsos MORI, an independent research organisation. They have a great deal of experience and expertise in surveying families and young people in particular.

We will write to you again soon to give you more details about the Age 14 Survey and to invite you to take part. An interviewer from Ipsos MORI will then get in touch with you. We really hope you and your child will take part again, as you make a unique contribution to the study which cannot be replaced. But it is of course your decision, and the interviewer will be happy to discuss this with you.

If you have any questions or would prefer not to be contacted about the Age 14 Survey, please call us on Freephone 0800 092 1250, email children@lse.ac.uk, or write to us at FREEPOST RTNC-LLLJ-RJBN, Child of the New Century, 20 Bedford Way, London, WC1H OAL. Please also let us know your new address if you have moved since the last time we saw you, so that we can reach you to invite you to take part.

You can keep up to date with the study through our website at www.childnc.net. The website includes lots of information about taking part, what we’ve learned, and even a new animated video about the study. You can also follow us on Twitter @childofthenewcentury and Facebook www.facebook.com/childofthenewcentury.

I look forward to keeping in touch with you as the study goes forward.

With kind regards,

Professor Fiona Fitzsimons, Study Director
Dear

I am writing to ask you and your family to help with Child of the New Century.

This important study follows the lives of thousands of young people born between 2000 and 2001 to understand what it is like growing up in the UK today. It provides information on young people’s health, education and what they do for fun. As you know, you are one of those young people who have been chosen out of all of the people in the country of your age.

You and your family have helped us before. We would be really grateful if you could help us again.

Please read the booklet included with this letter as it explains what we would like you to do and what it will be like. It will help you decide whether or not you want to take part.

Child of the New Century is run by the Institute of Education (IOE), a university in London. The IOE works with a company called Ipsos MORI, which does a lot of surveys with young people and their parents.

If you and your family want to take part, an interviewer from Ipsos MORI will come to your home to do the survey with you and your parent(s). The interviewer can answer any questions you have when they visit.

Your interviewer is a man/woman called: ........................................

Most young people find the activities we ask them to do fun and interesting. If you take part, you will receive a small gift as a thank you.

If you have any questions about the survey please talk to your parent(s) or contact Stephan Tietz at Ipsos MORI. You can email Stephan at childnc@ipsos.com or phone him on Freephone 0808 238 5446 between 9:30 am and 5:30 pm (Monday to Friday). Calls from landlines are free but costs from mobile phones may vary, so please check with your provider.

I hope you will help us again with this important study.

Professor Emia Fitzsimons
Study Director

Ipsos MORI

Advance letter for parents

Ref:

Dear

I am writing to invite you to help us again with the next stage of Child of the New Century. This is an important national study. It follows the lives of thousands of young people born in the UK in 2000/2001 and is used to find out how they grow up. It helps to improve services and support for young people and their families across the countries of the UK.

As you know, your child is one of those young people who have been chosen out of all of the people in the country of their age. Now that your child is 14, we would like to visit you to find out how your family is getting on. Your continued participation in the study is very important to us.

The enclosed booklet tells you more about the survey. We have also provided a letter and booklet for your child. Please read this and encourage your child to read their booklet before the interviewer arranges to visit.

Where two parents (or a parent and their partner) are living with the child, we would like you both to take part, as well as your child. We would like you to take part even if your child does not want to take part themselves. This is really important to the study.

The Age 14 Survey is being carried out by Ipsos MORI (an independent research organisation which carries out surveys with families) on behalf of a university in London - the Centre for Longitudinal Studies at the Institute of Education. Child of the New Century is paid for by the Economic and Social Research Council (ESRC) and government departments in all countries of the UK.

An interviewer from Ipsos MORI will contact you to ask if you would be willing to take part, and answer any questions you may have. Their name and contact details can be found at the bottom of this letter. If you would like to take part, they will arrange a convenient time to visit. You can also contact them directly to arrange an appointment on the number below.

All interviewers are fully trained. They carry an identification card with their photograph and the Ipsos MORI logo. The logo is shown at the bottom of this letter. All information collected will be treated in strict confidence in accordance with the Data Protection Act.

If you have any questions or prefer not to be contacted, please contact Stephan Tietz at Ipsos MORI by email at children@ipos.com or Freephone 0800 238 5446 between 8:30 am and 5:30 pm (Monday to Friday). Calls from landlines are free but costs from mobile phones may vary; please check with your provider.

I hope that you will be able to help with this important study.

Professor Emia Fitzsimons
Study Director

Your interviewer on this study will be:

WHAT WILL I GET FOR TAKING PART?
Do a word search and give a prize sample. We would like to ask your parents, what are the words you want to answer some questions. What is the puzzle? Yes. It’s still do to because you are not in public. Even if your parent say yes. We need to get your parents permission for this because of this special number and we will ask your parents permission for you to give a prize sample. We are not to take part, we can’t replace you with anyone else.

WILL ANYONE ELSE IN MY FAMILY TAKE PART?
You decide what you want to give the sample if you want to. Even if your parent agree you can take part in these activities. It’s up to you to decide what you want to do not take part. We can’t replace you with anyone else.

WHO DECIDES IF I CAN TAKE PART?
The interviewer will ask you to answer first if this tally for us to ask you to take part. It’s up to you to decide what you want to do not take part. We can’t replace you with anyone else.

WHAT’S SO IMPORTANT ABOUT AGE 14?
Age 14 is a very important age. You are starting to change and making new friends and changing about what you are experiencing and things. Making new friends and thinking about what you are experiencing and things. Making new friends and thinking about what you are experiencing and things. Making new friends and thinking about what you are experiencing and things. Making new friends and thinking about what you are experiencing and things. Making new friends and thinking about what you are experiencing and things. Making new friends and thinking about what you are experiencing and things. Making new friends and thinking about what you are experiencing and things.
WHAT ARE THE ACTIVITIES?

Your school principal, staff, and fellow students will want to know how you think you are doing and how you can improve. This activity will help you understand the meaning of different aspects of your life.

HOW?

We would like you to do two activities on a tablet that will help us measure how you think they are doing in school. They are not like school tests.

WHAT?

We would like you to answer some questions yourself on the tablet.
WHAT WILL HAPPEN TO THE SALIVA SAMPLE?

There is no risk to harm to you or others when giving a saliva sample. Your parents will be asked to do the same thing.

GIVING A SALIVA SAMPLE

You should not eat, drink, smoke, chew gum or do any of the following before giving a saliva sample:

- Brush your teeth
- Drink water
- Eat or drink anything
- Chew gum

There is no risk to harm to you or others when giving a saliva sample. Your parents will be asked to do the same thing.

HOW?

The interviewer will ask you to do the following. You can do it in private.

1. Take a saliva sample
2. Do your measurements
3. Take a saliva sample

The interviewer will explain how to do this.

WHY?

Researchers use saliva samples and measurements to study how genes work in your body.

RESEARCH ABOUT GENES

Giving a saliva sample

(6 MINUTES)

YOU GROW BE MEASURED TO UNDERSTAND HOW (10 MINUTES)

(10 MINUTES)
GOT QUESTIONS?
IS THERE ANYTHING ELSE YOU WILL ASK ME?

We would like to ask if you would be willing to give us your mobile phone number and email address (if you have one) so we can keep in touch with you about the study. Details to anybody else, and we will not contact you about anything other than this.

Child of the New Century

WHAT WILL HAPPEN TO MY INFORMATION?
The information will be sent back to a data management organisation (DMO) we will not see any identifiable data.

WHAT IF I CHANGE MY MIND IN THE FUTURE?
You can change your mind about taking part at any time by contacting us at: 
Prescot RCT, RCUKU-FSH
Child of the New Century
23 Bethard Way
London WC1X 9PS
Tel: 020 7080 0923
Email:原则上@newculc.uk

WILL ANYONE SEE THE INFORMATION I GAVE?
We keep your name and address completely separate from the information you give us. This way no one knows who your information is from.
A QUICK GUIDE TO THE AGE 14 SURVEY

We would like you to:

WE WOULD LIKE YOUR CHILD TO:

You can choose to do some and not others.
Your participation is entirely voluntary. You do not have to do all of the activities. You can choose to do some and not others.

- Ask some questions about your family (5 mins)
- Answer some questions about your current feelings (10 mins)
- Describe your daily life (or some days) (15 mins)
- Give a saliva sample
- Give an eye examination
- Complete a paper-based questionnaire
- Complete a short computer-based questionnaire
- Complete a longer computer-based questionnaire

The interviewer will arrange the visit for when it is most convenient. The interviewer can also arrange to come back on a different day if it and some things can be done at the same time.

The interview can also arrange to come back on a different day if it and some things can be done at the same time.
WHAT WILL WE BE ASKING YOUNG PEOPLE?

Understanding how young kids change over time.

- We collected information from focus groups of young people around the same age.
- The information comes from focus groups of young people.
- We include information on how they feel about themselves.

WHY IS THIS USEFUL?

Gives us an idea of what the information is important.

We would like to ask your child to answer some questions about their life.

WHAT WOULD WE LIKE YOUR CHILD TO DO?

Answer some questions about your family.
How do we measure your child?

Measuring your child is a simple process that helps us understand their growth and development. We would like to measure your child's height, weight, and body percentage.

Why is this useful?

We would like to measure your child's height, weight, and body percentage to understand how they grow.

What would we like your child to do?

What activities help us understand how they think?

We would like you to ask your child to do two activities on a tablet.

WILL YOU WANT TO SPEAK TO MY FAMILY AGAIN?

We would like to offer you the opportunity to speak to a member of our family. Please select your preference from the options below:

- Yes, I would like to speak to a member of my family.
- No, I do not want to speak to a member of my family.
- I am not sure, please contact me.

What if I have questions or concerns after the interview?

If you have any questions or concerns after the interview, please contact us at any time. Our team is here to assist you with any questions or concerns you may have. If you have any questions or concerns after the interview, please contact us at any time. Our team is here to assist you with any questions or concerns you may have.

Who can we contact if we have questions or concerns about the interview?

If you have any questions or concerns about the interview, please contact us at any time. Our team is here to assist you with any questions or concerns you may have.

What is the purpose of the interview?

The purpose of the interview is to assess your child's suitability for academic excellence. The interview will be conducted in a relaxed and comfortable environment and will be led by experienced professionals.

What are the interview requirements?

The interview requirements are as follows:

- The interview will be conducted in English.
- The interview will last for approximately 60 minutes.
- The interview will be conducted in a comfortable and relaxed environment.
- The interview will be led by experienced professionals.

Is there anywhere else I can find more information about the interview?

For more information about the interview, please visit our website or contact us directly.

**Name of young person (print):**

**Name of parent/guardian (print):**

## Questionnaire

I give my consent for the interviewer to ask my child if they would be willing to complete the young person questionnaire. **Please tick or initial box**

## Activities

I give my consent for the interviewer to ask my child if they are willing to take part in the:

- a) Word activity
- b) Decision-making activity

## Measurements

I give my consent for the interviewer to ask my child if they are willing to have the following measurements taken:

- a) Height
- b) Weight
- c) Body fat percentage

## Provision of contact details

I give my consent for the interviewer to ask my child if they are willing to provide their mobile telephone number for Child of the New Century to keep in contact with them about the study.

I give my consent for the interviewer to ask my child if they are willing to provide their email address for Child of the New Century to keep in contact with them about the study.

**IF APPLICABLE:**

### Time-use record

I give my consent for the interviewer to ask my child if they would be willing to complete the time-use record.

### Activity monitor

I give my consent for the interviewer to ask my child if they would be willing to wear an activity monitor and/or time-use record tasks.

## Parental confirmation

I have read or heard the information booklets ("What would we like you and your child to do?" and if applicable, "Wearing an activity monitor and completing a time-use record") about my child’s participation in the Child of the New Century Age 14 Survey. I understand what the survey involves and have discussed any outstanding questions with the interviewer. I am happy for my child named above to take part in the survey if they want to. I understand that my child or I can stop any part of the survey at any point or decline any part of it. I understand that all information will be treated in the strictest confidence in accordance with the Data Protection Act and will be used for research purposes only.

INTERVIEWER: You must make sure that the young person understands and agrees to the following points before you start the first young person element (refer to the advance booklet: "What would we like you to do?")

e) READ OUT: Child of the New Century is an important study of your generation. As you know, you are one of the young people who have been chosen out of all of the people in the country of your age. It provides information on young people’s health, education and what they do for fun.

b) READ OUT: I will ask you to fill in some questions and do some different activities. I will also ask your parent(s) if they live with you to answer some questions and give us a saliva sample.

c) READ OUT: It’s up to you whether you want to take part in the survey. It’s ok to do some things and not others. You can stop at any time.

d) READ OUT: Do you have any questions about the study?
INTERVIEWER CHECK: You must make sure that the young person has read and understood the information in the booklets “What would we like you to do?” and if applicable, “Wearing an activity monitor and completing a time-use record”. The headings below show which section of the booklets should be read and understood by the young person before asking consent.

For each, ensure that the young person has asked any questions they want to.

**Questionnaire (“Answer some questions about your life” in “What would we like you to do?”)**

READ OUT: I’d like you to answer some questions on my tablet. You can stop at any time. It is not a test so there are no right and wrong answers. If you don’t want to answer a question, that’s ok, you can skip it. It usually takes about 40 minutes.

READ OUT: Are you OK to answer some questions about your life?  

Yes No N/A - No parent consent given

**Young person’s contact details (“More information about the survey” in “What would we like you to do?”)**

READ OUT: Would you be willing to give us your mobile phone number so that we can keep in touch with you about the study? It will only be used for Child of the New Century. If YES RECORD IN CAPI.

Yes No N/A - No parent consent given

READ OUT: Would you be willing to give us your email address so that we can keep in touch with you about the study? It will only be used for Child of the New Century. If YES RECORD IN CAPI.

Yes No N/A - No parent consent given

**Activities (“Do some activities to understand how you think” in “What would we like you to do?”)**

READ OUT: I’d like to ask you to do two activities on my tablet. The word activity looks at how you understand the meaning of words. The decision-making activity looks at how you make decisions. I will show you what to do. You can stop at any time. These usually take about 20 minutes in total.

Are you OK to complete the...

Word activity?  

Yes No N/A - No parent consent given

Decision-making activity?  

Yes No N/A - No parent consent given

**Measurements (“Be measured to understand how you grow” in “What would we like you to do?”)**

READ OUT: I would like to measure how tall you are, how much you weigh and your body fat percentage. It is ok if you only want some of the measurements taken or if you don’t want any taken. You can change your mind once you’ve started. I won’t show or tell anyone (including your parent(s)) your measurements. This will take about 10 minutes in total.

Are you OK for me to measure your...

Height?  

Yes No N/A - No parent consent given

Weight?  

Yes No N/A - No parent consent given

Body fat percentage?  

Yes No N/A - No parent consent given

Interviwer Identity:

YP BARCODE
Saliva sample ("Giving a saliva sample for research about genes" in "What would we like you to do?")

READ OUT: I'd like to ask you to give a sample of your saliva. Your parent is happy for you to do this. It is still up to you whether you want to do it or not. It is very easy and I will explain how to do it. Your name and address will not be attached to the saliva sample.

READ OUT: Do you agree to give a sample of your saliva for research about genes?

Yes No N/A - No parent consent given

IF APPLICABLE: Time-use record ("Completing a time-use record" in "Wearing an activity monitor and completing a time-use record")

READ OUT: I would like you to tell us how you spend your time by filling in a time-use record. We'd like you to do this for one weekday and one weekend day after I've left. For each of the two days, it should take you around 30 minutes to fill in the record.

READ OUT: Are you OK to complete the time-use record?

Yes No N/A - No parent consent given

IF APPLICABLE: Activity monitor ("Wearing an activity monitor" in "Wearing an activity monitor and completing a time-use record")

READ OUT: I would like to ask you to wear an activity monitor that measures your physical activity. You will need to wear it on the same two days as the time-use record. It cannot tell where you are or see what you are doing.

READ OUT: Are you OK to wear an activity monitor?

Yes No N/A - No parent consent given

READ OUT: Would you be willing to give us your mobile phone number so that we can send you text reminders about the activity monitor and/or time-use record task(s)?

IF YES RECORD IN CAPI:

Yes No N/A - No parent consent given

Interviewer confirmation

I confirm the young person understands what the survey involves; that they have asked all questions they have about the survey and I have answered them to the young person's satisfaction, that the young person is aware they only have to do activities they want to do, and they can stop taking part and change their mind at any time.
