Introduction

This document was produced to accompany the MCS5 Derived Variables Dataset. The intention is to provide a suite of comparable longitudinal variables in the main domains of household composition, response, work, education, housing and anthropometry and psychological inventories.

No syntax or code has been included primarily because the variables were computed using SIR (www.sir.com.au) from the CLS survey database, where the variable names and structure of the data are different from the publically available data, and the code would be of little utility. However, the method and sources used are explained, including whether proxy information has been used (where appropriate).

Some variables are not directly comparable across sweeps, therefore it is important to read the documentation for each variable at each sweep before using them in any analysis. For example, the NVQ derived variables are comparable between MCS1 and MCS2, but these are not directly comparable with MCS3, MCS4 and MCS5 because neither the questions asked nor the banding of responses was the same at the later sweeps. NVQ at MCS3, MCS4 and MCS5 are comparable between themselves however.

MCS5 introduced long format for the person level and cohort member level files, including the parental interview and Cohort Member self completion and assessment files. This format includes data from each cohort member or the main and partner on different rows. This should simplify the process for researchers of merging both parental and cohort member level derived variables with information on the household grid, as well as other person and cohort level files.

As a result of the new long format, the derived variables are being held across three data files, one each for variables held at family, person and cohort member level respectively. The present guide divides the variables that have been derived from MCS5 research data into these three levels of cases.

If you have any questions or comments please contact CLS at clsfeedback@ioe.ac.uk.

**Education**

**EDDNVQ00 S5 DV Respondent NVQ equivalent Highest Level (across all sweeps)**

Looks at academic and vocational qualifications gained by the MAIN respondent since last interview (ACQU, VCQU) and compares them with the derived NVQ highest level from previous sweeps to ascertain the overall highest level attained across all sweeps. At MCS5 academic qualifications are collapsed into a 5 point scale:

1,3 = 5 "NVQ Level 5"
2,4,5 = 4 "NVQ Level 4"
6 = 3 "NVQ Level 3"
7 = 2 "NVQ Level 2"
8 = 1 "NVQ Level 1"
95 = 95 "Other academic quals"
96 = 96 "None of these"

where

1 = Higher Degree and Postgraduate qualifications
2 = First Degree (including B.Ed.)
3 = Post-graduate Diplomas and Certificates
4 = Diplomas in higher education and other higher education qualifications
5 = Teaching qualifications for schools or further education (below degree level)
6 = A/AS/S Levels/SCE Higher, Scottish Certificate Sixth Year Studies, Leaving Certificate or equivalent
7 = O Level or GCSE grade A-C, SCE Standard, Ordinary grades 1-3 or Junior Certificate grade A-C
8 = CSE below grade 1/GCSE or O Level below grade C, SCE Standard, Ordinary grades below grade 3 or Junior Certificate below grade C
95 = Other academic qualifications (incl. some overseas)
96 = None of these qualifications

At MCS5 vocational qualifications are collapsed into the same scale:

1 = 5 "NVQ Level 5"
2,3,4 = 4 "NVQ Level 4"
5,6,7 = 3 "NVQ Level 3"
8,9,10 = 2 "NVQ Level 2"
11,12,13 = 1 "NVQ Level 1"

where

1 = Professional qualifications at degree level e.g. graduate member of professional institute, chartered accountant or surveyor
2 = Nursing or other medical qualifications (below degree level)
3 = NVQ or SVQ level 4 or 5
4 = HND, HNC, Higher Level BTEC/RSA Higher Diploma
5 = NVQ or SVQ Level 3/GNVQ Advanced or GSVQ Level 3
6 = OND, ONCM BTEC National, SCOTVEC National Certificate
7 = City & Guilds advanced craft, Part III/RSA Advanced Diploma
8 = NVQ or SVQ Level 2/GNVQ Intermediate or GSVQ Level 2
9 = BTEC, SCOTVEC first or general diploma
10 = City & Guilds Craft or Part II/RSA Diploma
11 = NVQ or SVQ Level 1/GNVQ Foundation Level or GSVQ Level 1
12 = BTEC, SCOTVEC first or general certificate/SCOTVEC modules
13 = City & Guilds part 1/RSA Stage I,II,III/Junior certificate
95 = Other vocational qualifications (incl. some overseas )
96 = None of these qualifications

**NB:** NVQ vars at sweep 3 and 4 are collected differently from previous sweeps, and the bands are different, so comparison across sweeps will be difficult

**EDACAOQ00 S5 DV NVQ equivalent of highest academic level across sweeps**

Derived as EDDNVQ00, showing highest NVQ equivalent qualification but looking at only academic qualifications obtained since the previous interview. This is then compared to all previous sweeps to obtain the highest NVQ equivalent qualification across all sweeps.

At MCS5 academic qualifications are collapsed into a 5 point scale:

1,3 = 5 "NVQ Level 5"

Household composition

EDHTYP00  S5 DV Parents/Carers in Household

Is derived using CREL and PSEX from the Household Grid, by counting the numbers of each parent type:

- Natural Mother
- Natural Father
- Step Mother
- Step Father
- Step Parent
- Adoptive Father
- Adoptive Mother
- Adoptive Parent
- Other Parent
- Foster Parent
- GrandMother
- GrandFather
- Sibling
- Both Parents
- Other Relative
- Other Non Relative
- Unknown relationship

Families are then categorised by possible combination of them in the household:

**EDRELP00 S5 DV Relationship between Parents/Carers in Household**

Relationship between Parents/Carers (RESPONDENTS) in Household is derived using EHTYP to identify two-parent families, and using the main and partner person numbers EMPNUM00 and EPPNUM00. The code finds the relationship between these people from the household grid and flags them as married, cohabiting or neither.

**EDNATM00 S5 DV Natural mother status**

Uses EMPNUM00 and EPPNUM00 along with CREL and PSEX from the household grid to find the person number of the natural mother, if they are/were in the household. It looks at PTPC and PRES from HHGRID to ascertain whether the natural mother is resident full-time or part-time, or is in fact deceased. Then, for each person number the variable COPA is checked to see if the non-resident natural mother has contact or not with CM, or is deceased. Finally, if no other status already ascertained, picks up any people flagged as deceased at previous sweeps (MINH).

**EDTIMA00 S5 DV Time at current address (months)**

Time at current address (in months) is computed using the ADSA variables (address same as last interview) and moving dates mentioned at each sweep (AMOAD, AMOMO, BMOAD, BMOMO, CMOYR, CMOMN, EMOYR, EMOMN). For new families at MCS2, variable BADSA equals 0, but BMOAD and BMOMO hold dates moved to current address.
